Introduction

The information contained in this semiannual publication is updated to

reflect any action that has occurred on rules since preparation of the fall 2013 NRC Agenda, which was published on January 7, 2014 (79 FR 1294). Within each group (Prerule, Proposed, Final, and Long Term), the rules are ordered according to the Regulation Identifier Number (RIN).

The information in this Agenda has been updated through February 28, 2014. The date for the next scheduled action under the heading "Timetable" is the date the rule is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The Agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking process. However, the NRC may consider or act on any rulemaking even though it is not included in the Agenda.

The NRC Agenda lists all open rulemaking actions. Three rules impact small entities.

Common Prioritization of Rulemaking

The NRC has a process for developing rulemaking budget estimates and determining the relative priorities of rulemaking projects during budget formulation. This process produces a "Common Prioritization of Rulemaking" (CPR). The NRC adds new rules and evaluates rule priorities annually. The CPR process considers four factors and assigns a score to each factor. Those factors include (1) support for the NRC's Strategic Plan goals; (2) support for the NRC's Strategic Plan organizational excellence objectives; (3) a governmental factor representing interest to the NRC, Congress, or other governmental bodies; and (4) an external factor representing interest to members of the public, non-governmental organizations, the nuclear industry, vendors, and suppliers.

Section 610 Periodic Reviews Under the Regulatory Flexibility Act

Section 610 of the Regulatory Flexibility Act (RFA) requires agencies to conduct a review within 10 years of promulgation of those regulations that have or will have a *significant* economic impact on a *substantial* number of small entities. The NRC undertakes these reviews to decide whether the rules should be unchanged, amended, or withdrawn. At this time, the NRC does not have any rules that have a *significant* economic impact on a *substantial* number of small entities; therefore, the NRC has not included any RFA Section 610 periodic reviews in this edition of the Agenda. A complete listing of NRC regulations that impact small entities and related Small Entity

Compliance Guides is available on the NRC's Web site at <http://www.nrc.gov/about-nrc/regulatory/rulemaking/flexibility-act/small-entities.html>.

Dated at Rockville, Maryland, this 28th day of February, 2014.

399. • Revision of Fee Schedules: Fee Recovery for FY 2014 [NRC–2013–0276]

Legal Authority: 42 U.S.C. 2201; 42 U.S.C. 5841

Abstract: This proposed rulemaking would amend the Commission's licensing, inspection, and annual fees charged to its applicants and licensees. These amendments would implement the Omnibus Budget Reconciliation Act of 1990 (OBRA–90) as amended, which requires that the NRC recover approximately 90 percent of its budget authority in Fiscal Year (FY) 2014, less the amounts appropriated from the Waste Incidental to Reprocessing, and generic homeland security activities.

Long-Term Actions

400. Controlling the Disposition of Solid Materials [NRC–1999–0002]

Legal Authority: 42 U.S.C. 2201; 42 U.S.C. 5841

Abstract: The NRC staff provided a draft proposed rule package on Controlling the Disposition of Solid Materials to the Commission on March 31, 2005, which the Commission disapproved (ADAMS Accession Number: ML051520285). The rulemaking package included a summary of stakeholder comments (NUREG/CR–6682), Supplement 1, (ADAMS Accession Number:

ML003754410). The Commission's decision was based on the fact that the Agency is currently faced with several high priority and complex tasks, that the current approach to review specific cases on an individual basis is fully protective of public health and safety, and that the immediate need for this rule has changed due to the shift in timing for reactor decommissioning. The Commission has deferred action on this rulemaking.
