

an ASD; whether the use of BCaBAs and Behavioral Technicians creates more cost-effective access to ABA based on the limited number of BCBAAs and BCBA-Ds, while maintaining the quality of ABA; the appropriateness of requirements for providers, referral, authorization, treatment planning, assessment, testing, reimbursement, cost-sharing, discharge planning, and oversight to increase access to ABA for TRICARE beneficiaries with an ASD, while ensuring appropriate progress and utilization.

To collect necessary data to achieve the goals outlined for the Autism Care Demonstration, two parental surveys will be administered: The first at the mid-period of the Autism Care Demonstration (2016) and a second upon its conclusion (2018). These parental surveys will contain questions regarding: The reasons why parents avail themselves of the ABA tiered-delivery model, BCBA-only ABA, or no ABA; the perceived impairment(s) of their child with ASD; their degree of difficulty in accessing ABA and other clinical services with ASD; and, their overall satisfaction and perceived benefit regarding the ABA services provided.

The Autism Care Demonstration will provide the Department the opportunity to continue evaluating the provision of ABA under TRICARE while avoiding disruption of potentially therapeutic ABA interventions that could greatly benefit TRICARE beneficiaries with ASD. This information will be essential for determining it and how ABA should be delivered under TRICARE if the clinical community and accumulated evidence clearly indicates that ABA is a reliably evidence-based medical intervention for the treatment of ASD.
