Request for Information: The National Toxicology Program Interagency Center for the Evaluation of Alternative Toxicological Methods Requests Data and Information on Devices and/or Technologies Used for Identifying Potential Inhalation Hazards

SUMMARY: The National Toxicology
Program (NTP) Interagency Center for
the Evaluation of Alternative
Toxicological Methods (NICEATM)
requests available data and information
on devices and/or technologies
currently used for identifying potential
inhalation hazards. Submitted
information will be used to assess the
state of the science and determine the
technical needs for a dynamic
nonanimal system to assess the
potential toxicity of inhaled chemicals
and nanomaterials.

DATES: The deadline for receipt of information is July 18, 2014.

ADDRESSES: Data and information should be submitted electronically to *niceatm@niehs.nih.gov*.

FOR FURTHER INFORMATION CONTACT: Dr. Warren S. Casey, Director, NICEATM; email: warren.casey@nih.gov; telephone: (919) 316–4729.

SUPPLEMENTARY INFORMATION:

Background: NICEATM fosters the evaluation and promotion of alternative test methods for regulatory use in acute

toxicity assessment. Efforts to date have focused primarily on assessing test methods for oral and dermal hazards with limited efforts directed towards identifying alternatives for inhalation toxicity assessment. NICEATM is interested in receiving information on the state of the science regarding alternative test methods and testing strategies for acute or sub-chronic inhalation toxicity. This information will be used to determine the technical requirements for developing effective inhalation toxicity tools to assess potential chemical and nanomaterial hazards without the use of animals in testing.

Request for Information: NICEATM requests available data and information on devices and/or technologies currently used to identify potential inhalation hazards. To that end, NICEATM requests that respondents provide information on any activities relevant to the development or validation of alternatives to *in vivo* inhalation toxicity test methods currently required by regulatory agencies, including submission of substance-specific data derived from non-animal tests to identify acute or sub-chronic inhalation hazard potential. If available, corresponding in vivo data obtained for these substances are also requested, including data from any ethical human or animal studies or accidental human exposures.

Respondents to this request for information should include their name, affiliation (if applicable), mailing address, telephone, email, and sponsoring organization (if any) with their communications. The deadline for receipt of the requested information is July 18, 2014. Responses to this notice will be posted at http://ntp.niehs.nih.gov/go/41624 and persons submitting them will be identified by name and affiliation or sponsoring organization, if applicable.

Responses to this request are voluntary. No proprietary, classified, confidential, or sensitive information should be included in responses. This request for information is for planning purposes only and is not a solicitation for applications or an obligation on the part of the U.S. Government to provide support for any ideas identified in response to the request. Please note that the U.S. Government will not pay for the preparation of any information submitted or for its use of that information.

Background Information on NICEATM: NICEATM conducts data analyses, workshops, independent validation studies, and other activities to assess new, revised, and alternative test methods and strategies. NICEATM also provides support for the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM). The ICCVAM Authorization Act of 2000 (42 U.S.C. 285*l*–3) provides authority for ICCVAM and NICEATM in the development of alternative test methods. Information about NICEATM and ICCVAM is found at http://ntp.niehs.nih.gov/go/niceatm and http://ntp.niehs.nih.gov/go/iccvam.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG-2011-1156]

Draft Change to Navigation and Inspection Circular 01–13, Inspection and Certification of Vessels Under the Maritime Security Program

AGENCY: Coast Guard, DHS. **ACTION:** Notice of availability with request for comments.

SUMMARY: The Coast Guard announces the availability of a draft change to Navigation and Inspection Circular (NVIC) 01-13, Inspection and Certification of Vessels Under the Maritime Security Program (MSP). The MSP serves as a means for establishing a fleet of commercially viable and militarily useful vessels to meet national defense as well as other security requirements. NVIC 01-13 provides guidance to assist vessel owners/ operators, Authorized Classification Societies, and Coast Guard personnel with the inspection and certification of vessels under the MSP. This draft change clarifies the process for the issuance of the Certificate of Documentation (COD) to the vessel during the reflag process, adds a note to the equivalency provisions for inspection of MSP vessels subsequent to initial certification, clarifies the trial period requirements for automated systems in machinery spaces, includes interim provisions for those vessels seeking to operate with minimally attended or periodically unattended machinery spaces, and makes other nontechnical changes to NVIC 01-13. This notice solicits public comment on the impact of the draft change to NVIC 0113 on applicable vessels and other affected parties.

DATES: Comments and related material must either be submitted to the online docket via *http://www.regulations.gov* or reach the Docket Management Facility, on or before August 18, 2014. Documents discussed in this notice should be available in the online docket within three business days of today's publication.

NVIC 01–13 provides uniform process guidance to assist vessel owners/ operators, Authorized Classification Societies, and Coast Guard personnel regarding the MSP. Vessels that meet MSP eligibility criteria may obtain a Certificate Of Inspection (COI) by following the procedures and guidelines detailed in NVIC 01-13. NVIC 01-13 was first published in February 2013. As part of the first annual review, the Coast Guard has considered policy guidance enhancements in order to better facilitate the transition of vessels to U.S. registry under the MSP. This notice announces a change that would clarify trial period requirements for automated systems in machinery spaces, include interim provisions for those vessels seeking to operate with minimally attended or periodically unattended machinery spaces, and make other nontechnical changes to NVIC 01-13.

Specifically, this draft change to NVIC 01–13 clarifies the process for the issuance of the Certificate of Documentation (COD) to the vessel during the reflag process, adds a note to the equivalency provisions for inspection of MSP vessels subsequent to initial certification, clarifies the trial period requirements for automated systems in machinery spaces, and includes interim provisions for those vessels seeking to operate with minimally attended or periodically unattended machinery spaces (MAMS/ PUMS), which do not otherwise meet the requirements of 46 CFR 62.50-20 and/or 62.50-30 (as appropriate).

We request comments from all interested parties on this draft change to NVIC 01–13. The Coast Guard will consider all comments on this draft change before issuing an updated version of NVIC 01–13.

This notice is issued under authority of 5 U.S.C. 552(a).
