*Policy Justification**Brazil—M113A2MK1 Upgrade Kits*

The Government of Brazil has requested a possible sale of 434 M113A2MK1 Kits to upgrade M113 Armored Personnel Carriers (APCs) to the M113A2MK1 configuration, spare and repair parts, support equipment, tools and test equipment, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor technical, engineering, and logistics support services, and other related elements of logistics and program support. The estimated cost is \$131 million.

The proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of Brazil, which has been, and continues to be, an important force for regional stability and economic progress in South America.

Brazil will use this upgrade equipment to modernize and improve its fleet of armored personnel carriers. The M113A2MK1 APCs will provide the Brazilian Army with a more reliable, agile, and effective infantry vehicle

capability. Brazil will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be BAE Systems in York, Pennsylvania. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require two U.S. Government or contractor representatives to travel to Brazil for a period of up to seven years to provide technical assistance during the upgrade of the 434 vehicles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
