ICR Title: Request for Contractor Access to TSCA Confidential Business Information (CBI).

ICR numbers: EPA ICR No. 1250.10, OMB Control No. 2070-0075.

ICR status: The current OMB approval for this ICR is scheduled to expire on June 30, 2014. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Certain employees of companies working under contract to EPA require access to CBI collected under the authority of TSCA in order to perform their official duties. The Office of Pollution Prevention and Toxics (OPPT), which is responsible for maintaining the security of TSCA confidential business information, requires that all individuals desiring access to TSCA CBI obtain and annually renew official clearance to TSCA CBI. As part of the process for obtaining TSCA CBI clearance, OPPT requires certain information about the contracting company and about each contractor employee requesting TSCA CBI clearance, primarily the name, EPA badge number or other identification of the employee, the type of TSCA CBI clearance requested and the justification for such clearance, and the signature of the employee to an agreement with respect to access to and use of TSCA CBI. This collection addresses the above information requirements.

Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Respondents/affected entities: Entities potentially affected by this action are companies under contract to the Environmental Protection Agency to

provide certain services, whose employees must have access to Toxic Substances Control Act (TSCA) confidential business information to perform their duties.

Respondent's obligation to respond: Voluntary. Failure to provide the requested information, however, will prevent a contractor employee from obtaining clearance to TSCA CBI.

Estimated number of respondents: 20 (total).

Frequency of response: On occasion.

Total estimated burden: 483 hours per year. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$25,875 per year, includes \$0 annualized capital or operation and maintenance costs.

Changes in the estimates: There is a decrease of 118 hours (from 601 hours to 483 hours) in the burden estimated for this request compared with the information request most recently approved by OMB. This decrease reflects EPA's reduction in the estimated number of contractor employees needing clearance. This change is an adjustment.

Acting Director, Collection Strategies Division.

The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 61, subpart A, and any changes or additions to the Provisions specified at 40 CFR part 60, subpart DDDD. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners and operators are also required to

maintain records of the occurrence and duration of any startup, shutdown or malfunction in the operation of an affected facility, or any period when the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities: Owners or operators of commercial and industrial solid waste incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart DDDD).

Estimated number of respondents: 57 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 7,378 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,694,601 (per year), includes \$8,271,404 annualized capital or operation & maintenance costs.

Changes in the Estimates: The change in the burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment, conducting performance tests and establishing recordkeeping systems. This ICR, by in large, reflects the on-going burden and costs for existing facilities. Activities for existing source include continuously monitoring of pollutants and the submission of annual performance test results and semiannual reports of exceedances. The overall result is a decrease in burden hours and labor costs. However, there is an increase in the total O&M costs as this ICR reflects the burden associated with annual performance testing requirement of the Emission Guidelines.

In addition to the changes above, this ICR revises the number of respondents using the latest Agency estimates, and corrects the number of responses as the previous ICR incorrectly included internal records as a response. This attributes to a decrease in the number of respondents and number of responses.

Spencer W. Clark,

Acting Director, Collection Strategies Division.
