SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Office of Naval Research (ONR) As One Survey; OMB Control Number, 0703-TBD.

Needs and Uses: The Chief of Naval Research requires a method to better understand how the total ONR workforce is aligned and executes the Command's mission and strategic initiatives. A survey will allow ONR to collect data around the workforce's affinity within organizational groups, commitment to strategic initiatives, and understanding of how they work together to achieve ONR's mission.

Non-government personnel (Contractors and Intergovernmental Personnel Act (IPAs) staff) comprise approximately half of ONR's total workforce population. As such, surveying these non-government personnel is required to capture a holistic view of the total ONR workforce and provide leaders with information to make informed workforce decisions. These "contingent" workforce members perform a wide-range of functions and are uniquely qualified individuals brought in to support science and technology management. These individuals move across the organization adapting quickly to new issues and projects. They must understand customers and the interworking of ONR. They represent the core of the cross-functional matrix team concept and act as facilitators and nodes among specialist and government professionals. The combination of these contingent workers and government personnel comprise the ONR workforce of the future. Truly understanding the concerns and motivation of this segment of the workforce will facilitate increased creativity and discretionary effort across the enterprise.

The information collected in the survey will be used by ONR executives to measure performance of the organization, proactively inform workforce engagement strategies for greater resonance and impact, and prepare for and implement organizational changes in the near- and long-term.

Affected Public: Individuals and Households: Non-government employees at ONR.

Annual Burden Hours: 139.

Number of Respondents: 555.

Responses per Respondent: 1.

Average Burden per Response: 15 minutes.

Frequency: One Time.

ONR continues to experience significant organizational and operational changes. In order to successfully and efficiently implement these changes, the Chief of Naval Research must understand information related to the following: (1) The degree of organizational coherence behind executing strategic goals and priorities; (2) data to measure performance of the organization and proactively inform workforce engagement strategies to optimize resonance and impact; and (3) how to prepare for and implement organizational changes in the near- and long-term. Currently, no databases or surveys exist to provide information on these areas as it relates to the total ONR workforce. The ONR As One survey is designed to provide the three information needs described above by surveying the ONR workforce. As an online survey, it is the most cost- and time-effective means for collecting the required information. Because nongovernment employees comprise approximately half of ONR's total workforce, it is imperative that these workforce member types are included in the survey population. The feedback from these workforce member types is critical to the goal of capturing an accurate representation of the ONR total workforce on the measures that are of interest to the organization's leadership: The information collected in the survey will be used to measure performance of the organization, proactively inform workforce engagement strategies for greater resonance and impact, and prepare for and implement organizational changes in the near- and long-term. All information will be collected by an online survey and all data will be reported in the aggregate.

Dated: June 23, 2014.

Alternate OSD Federal Register Liaison Officer, Department of Defense.
