

amend the Appendices. This information is also available upon request from the Division of Scientific Authority at ScientificAuthority@fws.gov, or via mail from CITES Division of Scientific Authority, 4401 North Fairfax Drive, Suite 110, Arlington, Virginia 22203.

What information should be submitted?

In response to this notice, to provide us with information and recommendations on species subject to international trade for possible proposals to amend the Appendices, please include as much of the following information as possible in your submission:

- (1) Scientific name and common name;
- (2) Population size estimates (including references if available);
- (3) Population trend information;
- (4) Threats to the species (other than trade);
- (5) The level or trend of international trade (as specific as possible but without a request for new searches of our records);
- (6) The level or trend in total take from the wild (as specific as reasonable); and
- (7) A short summary statement clearly presenting the rationale for inclusion in, or removal or transfer from, one of the Appendices, including which of the criteria in Resolution Conf. 9.24 (Rev. CoP16) are met.

If you wish to submit more complete proposals for us to consider, please consult Resolution Conf. 9.24 (Rev. CoP16) for the format for proposals and a detailed explanation of each of the categories. Proposals to transfer a species from Appendix I to Appendix II, or to remove a species from Appendix II, must also be in accordance with the precautionary measures described in Annex 4 of Resolution Conf. 9.24 (Rev. CoP16).

What will we do with the information we receive?

The information that you submit will help us decide if we should submit, or co-sponsor with other Parties, a proposal to amend the CITES Appendices. However, there may be species that might qualify for CITES listing but for which we may decide not to submit a proposal to CoP17. Our decision will be based on a number of factors, including available scientific and trade information; whether or not the species is native to the United States; and for foreign species, whether or not a proposal is supported or co-sponsored by at least one range country for the species. These factors and others

are included in the U.S. approach to CoP17, described above in this notice. We will carefully consider all factors of the U.S. approach when deciding which species the United States should propose for inclusion in the Appendices.

We will consult range countries for foreign species, and for species we share with other countries, after receiving and analyzing the information provided by the public in response to this notice as well as other information available to us.

One important function of the CITES Scientific Authority of each Party country is monitoring the international trade in plant and animal species, and ongoing scientific assessments of the impact of that trade on species. For native U.S. species listed in Appendices I and II, we monitor trade and export permits authorized so that we can prevent over-utilization and restrict exports if necessary. We also work closely with the States to ensure that species are correctly listed in the CITES Appendices (or not listed, if a listing is not warranted). For these reasons, we actively seek information about U.S. and foreign species subject to international trade.

Future Actions

As stated above, the next regular meeting of the Conference of the Parties (CoP17) is tentatively scheduled to be held in South Africa, in 2016. The United States must submit any proposals to amend Appendix I or II, or any draft resolutions, decisions, or agenda items for discussion at CoP17, to the CITES Secretariat 150 days prior to the start of the meeting. In order to meet this deadline and to prepare for CoP17, we have developed a tentative U.S. schedule.

We plan to publish a **Federal Register** notice approximately 15 months prior to CoP17; in that notice, we intend to request potential resolutions, decisions, and agenda items for discussion at CoP17, and to announce the tentative species proposals that the United States is considering submitting for CoP17 and solicit further information and comments on them.

Approximately 9 months prior to CoP17, we plan to publish a **Federal Register** notice announcing proposed resolutions, decisions, and agenda items the United States is considering submitting for CoP17.

Approximately 4 months prior to CoP17, we will post on our Web site an announcement of the species proposals, draft resolutions, draft decisions, and agenda items submitted by the United

States to the CITES Secretariat for consideration at CoP17.

Through a series of additional notices and Web site postings in advance of CoP17, we will inform you about preliminary negotiating positions on resolutions, decisions, and amendments to the Appendices proposed by other Parties for consideration at CoP17, and about how to obtain observer status from us. We will also publish an announcement of a public meeting tentatively to be held approximately 3 months prior to CoP17; that meeting will enable us to receive public input on our positions regarding CoP17 issues. The procedures for developing U.S. documents and negotiating positions for a meeting of the Conference of the Parties to CITES are outlined in 50 CFR 23.87. As noted, we may modify or suspend the procedures outlined there if they would interfere with the timely or appropriate development of documents for submission to the CoP and of U.S. negotiating positions.

Author

The primary author of this notice is Jon Siemien, Division of Scientific Authority, U.S. Fish and Wildlife Service.

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: May 20, 2014.

Rowan W. Gould,

Acting Director.

Golden Eagles; Programmatic Take Permit Decision; Finding of No Significant Impact of Final Environmental Assessment; Shiloh IV Wind Project, Solano County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability of a Finding of No Significant Impact (FONSI) and final Environmental Assessment (FEA) under the National Environmental Policy Act (NEPA) for the issuance of a take permit for golden eagles pursuant to the Bald and Golden

Eagle Protection Act (Eagle Act), in association with the operation of the Shiloh IV Wind Project in Solano County, California. The FEA was prepared in response to an application from Shiloh IV Wind Project, LLC (applicant), an affiliate of EDF Renewable Development, Incorporated, for a 5-year programmatic take permit for golden eagles under the Eagle Act. The applicant will implement a conservation program to avoid, minimize, and compensate for the project's impacts to eagles, as described in the applicant's Eagle Conservation Plan (ECP). We solicited comments on the draft Environmental Assessment (Draft EA) and have reviewed those comments in the course of preparing our findings for this project. Based on the FEA the Service concludes that a Finding of No Significant Impact (FONSI) is appropriate. Based on the FONSI and findings we prepared associated with the permit application, we intend to issue the permit after 30 days.

ADDRESSES: *Obtaining Documents:* You may download copies of the FONSI, FEA, our Response to Comments on the Draft EA, and the Final ECP for Shiloh IV Wind Project on the Internet at <http://www.fws.gov/cno/conservation/migratorybirds.html>. Alternatively, you may use one of the methods below to request a CD-ROM of the document.

- *Email:* ShilohIV_comments@fws.gov.

- *U.S. Mail:* Heather Beeler, Migratory Bird Program, U.S. Fish and Wildlife Service, Pacific Southwest Regional Office, 2800 Cottage Way, W-2605, Sacramento, CA 95825.

FOR FURTHER INFORMATION CONTACT: Heather Beeler, Migratory Bird Program, at the address shown above or at (916) 414-6651 (telephone).

SUPPLEMENTARY INFORMATION:

Introduction

The U.S. Fish and Wildlife Service evaluated an application under the Bald and Golden Eagle Protection Act (16 U.S.C. 668a-d; Eagle Act) for a programmatic golden eagle (*Aquila chrysaetos*) take permit from the Shiloh IV Wind Project LLC, (applicant) an affiliate of EDF Renewable Development, Incorporated, for a 5-year programmatic take permit for golden eagles. The Shiloh IV Wind Project is an operational wind facility in the Montezuma Hills Wind Resource Area (WRA) within Solano County, California. The application includes an

Eagle Conservation Plan (ECP) as the foundation of the applicant's permit application, as well as a Bird and Bat Conservation Strategy (BBCS). The ECP and BBCS describe actions taken and proposed future actions to avoid, minimize, and mitigate adverse effects on eagles, birds, and bats.

We prepared this FEA to evaluate the impacts of several alternatives associated with this permit application for compliance with our Eagle Act permitting regulations in the Code of Federal Regulations (CFR) at 50 CFR 22.26, as well as impacts of implementation of the supporting ECP, which is included as an appendix to the FEA.

Public Comments on the Draft EA

We invited public comment on the Draft EA. In response, we received 32 comment letters: One from the U.S. Environmental Protection Agency, 3 from Native American tribes, 6 from nongovernmental organizations (NGOs), and 22 from the general public. Three NGO comment letters combined comments from multiple organizations, the first letter representing two environmental groups, the second representing six environmental groups, and the third representing two industry associations. In total, the 32 comment letters contained approximately 125 individual comments. These comments generally fell under one of five main categories: (1) Effects (addressing a variety of issues including age of the birds killed, number of fatalities, local population effects, cumulative effects, other sources of fatalities, and overall population numbers), (2) advanced conservation practices (ACPs) (addressing the Technical Advisory Committee (TAC), seasonal shutdowns, transparency of the process and future ACPs, project design, and seasonal curtailment), (3) mitigation (addressing methods for calculating mitigation requirements, monitoring of retrofits, location of retrofits, biological value of retrofits, and additional alternative measures, such as using new technologies, capturing and relocating eagles, and promoting establishment of new eagle nests), (4) monitoring and reporting (addressing frequency and length of the monitoring program, the reporting system, study design, and the desire to have third-party verification), or (5) general comments about the permitting program (including comments opposing the issuance of an eagle take permit).

Overall, the comments raised issues regarding the opportunities and challenges associated with issuing eagle take permits. We made minor changes to

three topic areas of the FEA based on these comments. First, under the adaptive management process, we clarified that the TAC was intended to include only Service staff as overseers of the permit. We added more detailed information on the compensation program (utility electric pole retrofitting) and the resource equivalency analysis process used to calculate compensation. We also expanded our discussion of climate change with respect to its potential effects to eagles. After considering the comments, and in light of the record, we determined that neither substantial revisions nor a new analysis are required for the FEA. Detailed responses to specific comments are included in the FONSI (Attachment 2).

Decision

The Service has selected Alternative 3, issuance of a 5-year permit based on the applicant's ECP with additional mitigation and monitoring, and has determined that a Finding of No Significant Impact (FONSI) is appropriate for this action. Based on the FONSI and findings prepared associated with the permit application, we intend to issue a permit after 30 days.

Authority

We provide this notice under Section 668a of the Eagle Act (16 U.S.C. 668-668c) and NEPA regulations (40 CFR 1506.6).

Dated: June 19, 2014.

Alexandra Pitts,

Deputy Regional Director, Pacific Southwest, Sacramento, California.

Monomoy National Wildlife Refuge, Chatham, MA; Draft Comprehensive Conservation Plan and Environmental Impact Statement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; extension of public comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), advise the public that we are extending the public review and comment period for the draft comprehensive conservation plan (CCP) and environmental impact statement (EIS) for Monomoy National Wildlife Refuge (NWR).
