Food and Nutrition Service

Title: Child Nutrition Database.

OMB Control Number: 0584–0494.

Summary of Collection: The Child Nutrition (CN) Database is a necessary component in implementation of USDA's Food and Nutrition Service (FNS) National School Lunch Program (NSLP) and School Breakfast (SBP); The regulations (7 CFR 210.10) require state agencies to conduct a nutrient analysis of school lunches and breakfast as part of administrative review to monitor compliance with the specifications for certain nutrients. The CN Database provides the SFAs with the necessary nutrient information for this purpose.

Need and Use of the Information: FNS will collect information on (1) USDA commodities; (2) USDA Nutrient Database for Standard Reference food items which are used in the SBP and NSLP; (3) quantity recipes for school food service developed by USDA; and (4) brand name commercially processed foods. State agencies ability to conduct a weighted nutrient analysis of the reimbursable meals for administrative review is dependent upon availability of CN database. The information gathered for the CN Database is required to be used in software programs approved by USDA for use in meeting the nutrient standards and nutrition goals of the Child Nutrition Programs. Both the State agencies and program operators use the information for auditing and menu planning purposes. If the information is not collected or updated regularly for the CN Database, the nutrient data will become less useful to program operators, causing them to rely on their vendor for required nutritional information.
