

Public Comments and FERC

Responses: A summary of the comments filed by the public in response to the 30-day notice for the FERC-520, FERC-561, and FERC-566 information collections and FERC's responses are provided below.

Public Comments: A number of commenters request changes to Form 561. For example, the Electric Power Supply Association (EPSA) argues that the Commission should modify Form 561 to allow individuals holding interlocking positions pursuant to automatic authorization to check a box indicating that they hold interlocking positions solely with affiliated entities. Similarly, NRG Energy (NRG) argues that, instead of requiring the Form 561, the Commission should consider an annual report where those holding covered positions are permitted to check a box indicating that they are the officer or director of affiliated entities, whether the entities are public utilities, electrical equipment suppliers, fuel suppliers or none of the categories. White & Case LLP (White & Case) submits that the Commission should only require the re-filing of an updated Form 561 after a year in which the individual changed reportable positions from those previously reported in a prior Form 561.

Commenters also request certain exemptions from the FERC-520 and FERC-566 reporting requirements. White & Case suggests that the Commission should not require an informational report under Part 45 for automatic authorization to hold officer/director positions with more than one public utility in a corporate family when the corporate family does not include any franchised public utility with captive customers. White & Case also recommends that the Commission eliminate the requirement to file notices of change under section 45.5 of the Commission's regulations and the requirement to file FERC-566 for public utilities that do not make any reportable sales. NYISO argues that it should be exempted from the requirement to submit FERC-566. EPSA and NRG suggest that the Commission should exempt electric wholesale generators (EWG) from the FERC-566 filing requirement.

FERC's Response: The Commission shares commenters' interest in identifying and implementing burden reductions to the benefit of filers as well as the Commission. Nevertheless, commenters' suggestions raise issues that require additional study. Moreover, should the Commission determine after further study to pursue changes to these information collections, those changes would be more appropriately addressed

in a forum and through a process that is better suited to full public identification of and deliberation on possible proposed changes. Any changes to the Commission's regulations would need to be made through the Commission's formal rulemaking process. Given competing demands on the resources of both the Commission and industry, we estimate that it would take more than two years to complete the rulemaking process for the three information collections. That period includes the development, preparation and issuance of a Notice of Proposed Rulemaking, review of the submitted comments, the preparation and promulgation of a Final Rule and the development and implementation of any necessary software changes. As a result, the Commission is requesting that OMB extend the three collections for three years and thus provide the Commission with the necessary time to consider the issues and, if it decides that changes may be warranted, to promulgate any necessary rulemakings.

Additional Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.
