SUPPLEMENTARY INFORMATION: On October 17, 2003, FHWA, in cooperation with MDSHA and PennDOT, issued an NOI to prepare an Environmental Impact Statement (EIS) for a proposed transportation project along Section 019 of U.S. 219. This section extends from the southern terminus of the Meyersdale Bypass in Somerset County, Pennsylvania to I-68 in Garrett County, Maryland. The US 219 project limits remain the same as previously proposed in 2003 and the total length of the project remains approximately 8 miles, with about 2.5 miles in Maryland and 5.5 miles in Pennsylvania.

The agencies will continue to work together to complete the environmental review process and move the project forward within a reasonable and feasible timeframe. This will accomplish the goals of Section 1528 of MAP-21, which addresses the Appalachian Development Highway System (ADHS) and timely completion of the designated ADHS in 13 States that comprise the Appalachian region. The EIS will utilize and update data and information developed since the 2003 NOI was published, including the project purpose and need and alternatives, which were developed as a result of agency coordination and public input. The US 219 project is currently funded for project planning only and is intended to advance the project to a draft EIS and final EIS including consideration of new alternatives based on public and agency comments. The US 219 Project Public Involvement Program and coordination with Federal, state, and local agencies that began in 2003 will continue. To ensure that a full range of alternatives or issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning the proposed actions for the project should be directed to FHWA, MDSHA, or

PennDOT at the contact information provided above.
