

The results of an initial USDOT led analysis will be presented and feedback will be sought during this public workshop. The agenda will focus discussion on:

- Which interfaces have been identified as candidates for standardization;
- The process used for the identification and prioritization of these interfaces and associated information exchanges; and
- Results from the analysis which:
 - Identify how standards that exist today may satisfy interface and exchange needs or may require some level of modification; and
 - Identify standards gaps that exist.

It is expected that results from this analysis will inform USDOT decision making regarding future support of specific standards activities. The project is sponsored and led by the USDOT's ITS JPO as part of the ITS Architecture and Standards Program and Systems Engineering and Test Bed Program efforts.

Updates will be available on the ITS Program Web site at: <http://www.its.dot.gov/> under Press Room: Public Meetings and Events, and on the ITS Standards Web site at: <http://www.standards.its.dot.gov/DevelopmentActivities/CVReference>.

SUPPLEMENTARY INFORMATION: As the results of the CVRIA, interface analysis, and standardization efforts are expected to affect a wide variety of public and private organizations, it is important that the analyses incorporate, as appropriate, the needs and requirements of the CV community. This workshop is an appropriate opportunity for external stakeholders to engage in the standards discussion.
