Scoping Process

This NOI re-initiates the scoping process, which guides the development of the EIS. Public participation will be especially important at several points during the analysis. The Petersburg Ranger District is seeking information and comments from Federal, State, and local agencies, tribal organizations, individuals, businesses and organizations that may be interested in, or affected by, the proposed project. This project was originally scoped under the NOI on May 7, 2010. This correction notice is filed since the Proposed Action has changed. Additionally the project was originally scoped under the 36 CFR 215 Notice, Comment and Appeal Procedures. The 215 appeal procedures have been replaced by the Project-Level Pre-decisional Administrative Review Process, 36 CFR Part 218 as of March 27, 2013. The "objection process" allows parties who have submitted timely, specific written comments during Forest Service-announced public comment periods, such as this scoping period or when the Draft EIS goes out for public comment, to object to the decision being drafted. No public meetings are to be held with the release of this NOI. Public meetings will be held in Petersburg and Kake in conjunction with the release of the Draft EIS in September.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the EIS. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted during the earlier scoping period are part of the project record and do not need to be re-submitted.

Dated: July 18, 2014.

Forest Supervisor.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3014-0011.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Type of Review: Renewal of a generic information collection.

Background: The proposed information collection activity provides a means to gather qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training, or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Access Board and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

Frequency of Response: Once per request.

Estimated Average Burden per Response: 7.25 minutes.

Estimated Total Annual Burden: 120 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) whether the proposed collection of information is necessary for the Access Board's performance; (b) the accuracy of the estimated burden; (c) ways for the Access Board to enhance the quality, utility, and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. We will summarize your comments in the request for OMB's clearance of this information collection.
