OMB Control Number: 2120-XXXX

Title: Helicopter Air Ambulance

Operator Reports

Form Numbers: There are no FAA forms associated with this collection.

Type of Review: Clearance of a new information collection.

Background: The FAA Modernization and Reform Act of 2012 mandates that all helicopter air ambulance operators must begin reporting the number of flights and hours flown, along with other specified information, during which helicopters operated by the certificate holder were providing helicopter air ambulance services. See 49 U.S.C. 44731. The helicopter air ambulance operational data provided to the FAA will be used by the agency as background information useful in the development of risk mitigation strategies to reduce the currently unacceptably high helicopter air ambulance accident rate, and to meet the mandates set by Congress. Upon approval of this information collection the FAA intends to amend helicopter air ambulance operators' Operations Specifications to require submission of the data, mandated by Congress, to the FAA.

The FAA notes that prior to issuance of this notice representatives from the Flight Standards Service, Office of Accident Investigation and Prevention, and the Office of the Chief Counsel met with representatives from the Air Medical Operators Association (AMOA) to discuss the FAA's approach to this data collection. Meetings were held on October 15, 2012 and May 17, 2013. On June 28, 2013 AMOA submitted a response to the FAA discussing its view of the method to collect the data being pursued by the FAA. A copy of that letter has been placed in the docket and will be considered by the agency.

Respondents: 73 helicopter air ambulance certificate holders.

Frequency: Information is collected annually.

Estimated Average Burden per Response: 6 hours.

Estimated Total Annual Burden: 588 hours.
