I. What Is Transportation Conformity?

Transportation conformity is required under section 176(c) of the Clean Air Act to ensure that Federally supported highway, transit projects, and other activities are consistent with (conform to) the purpose of the SIP. Conformity currently applies to areas that are designated nonattainment, and those redesignated to attainment after 1990 (maintenance areas), with plans developed under section 175A of the Clean Air Act for the following transportation related criteria pollutants: Ozone, particulate matter (PM_{2.5} and PM₁₀), carbon monoxide (CO), and nitrogen dioxide (NO₂). Conformity for purposes of the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS). The transportation conformity regulation is found in 40 CFR part 93 ("Federal conformity rule") and provisions related to conformity SIPs are found in 40 CFR 51.390.
