SUPPLEMENTARY INFORMATION:**I. Background**

This interim rule amends the DFARS to implement section 1602 of the NDAA for FY 2014 (Pub. L. 113-66). Section 1602 prohibits award of a contract for commercial satellite services to a foreign entity if the Secretary of Defense reasonably believes that the foreign entity—

- Is an entity in which the government of a covered foreign country has an ownership interest that enables the government to affect satellite operations; or
- Plans to, or is expected to, provide or use launch or other satellite services under the contract from a covered foreign country.

A covered foreign country means the People's Republic of China, North Korea, or any country that is a state sponsor of terrorism, as described in section 1261(c)(2) of the NDAA for FY 2013 (Pub. L. 112-239). State sponsors of terrorism, as determined by the Secretary of State, currently include Cuba, Iran, Sudan, and Syria.

II. Discussion and Analysis

This interim rule adds a new section at DFARS 225.772 that addresses the prohibition on acquisition of commercial satellite services from certain foreign entities and adds a provision at DFARS 252.225-7049 that requires offerors to represent whether they are foreign entities that fall within the prohibition, or whether they are offering commercial satellite services provided by such a foreign entity. If the offeror responds affirmatively to any of the representations, then the offeror must provide further disclosure regarding the circumstances.

The prohibition on award to such foreign entities does not apply if the Secretary of Defense for Acquisition, Technology, and Logistics or the Under Secretary of Defense for Policy, without power of redelegation, determines that it is in the national security interest of the United States to enter into such contract and, not later than seven days before entering into such contract, the Under Secretary of Defense making the determination, in consultation with the Director of National Intelligence, submits to the congressional defense committees a national security

assessment in accordance with 10 U.S.C. 2279.

There are conforming changes to DFARS 204.1202 and 252.205-7007 to include the new representations in the annual representations and certifications, and changes to DFARS 212.301(f) to add the new provision to the list of provisions and clauses that are applicable to the acquisition of commercial items.

III. Applicability to Acquisitions Not Greater Than the Simplified Acquisition Threshold (SAT) and Commercial Items

10 U.S.C. 2279 is silent on applicability to contracts and subcontracts in amounts not greater than the SAT or for the acquisition of commercial items. Also, the statute does not provide for criminal or civil penalties. Therefore, it does not apply to the acquisition of contracts and subcontracts in amounts not greater than the SAT or the acquisition of commercial items unless the Director, DPAP, makes a written determination as provided in 41 U.S.C. 1905.

There is a potential risk to national security if DoD uses commercial satellite services for DoD communications and the government of a covered foreign country has an ownership interest that enables the government to affect satellite operations, regardless of the dollar value of the contract or order. Likewise, if launch or other satellite services under the contract are occurring in a covered country, the government of that country could impact the ability of the foreign entity to adequately provide those services. Furthermore, although 10 U.S.C. 2279 does not specifically reference 41 U.S.C. 1906, the statute only applies to the acquisition of commercial satellite services, so exempting commercial items from application of the statute would negate the intended effect of the statute. Therefore, consistent with 41 U.S.C. 1905 and 1906, the Director, Defense Procurement and Acquisition Policy, has determined that it would not be in the best interest of the United States to exempt acquisitions not greater than the SAT and acquisitions of commercial items from the applicability of 10 U.S.C. 2279.

IV. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic,

environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

V. Regulatory Flexibility Act

DoD does not expect this interim rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* However, an initial regulatory flexibility analysis has been performed and is summarized as follows:

DoD is issuing an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement section 1602 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2014. Section 1602 added 10 U.S.C. 2279, which prohibits acquisition of commercial satellite services from certain foreign entities.

The objective of the rule is to implement 10 U.S.C. 2279, which is the legal basis for the rule. The statute prohibits award of contracts for commercial satellite services to a foreign entity that—

- Is an entity in which the government of a covered foreign country (i.e., the People's Republic of China, North Korea, Cuba, Iran, Sudan, or Syria) has an ownership interest that enables the government to affect satellite operations; or
- Plans to, or is expected to, provide or use launch or other satellite services under the contract from a covered foreign country.

DoD estimates that this rule will apply to less than 111 small entities. According to Federal Procurement Data System data for FY 2013, 111 small entities were awarded contracts or orders for services in PSC D304 (ADP Telecommunications and Transmission Services), of which commercial satellite services are a subset. Although the focus of the Regulatory Flexibility Act is protection of domestic small business entities that are eligible for assistance from the Small Business Administration, there may be domestic small business entities in the United States that offer the satellite services of a foreign entity that would be restricted by this rule.

This rule requires an annual representation as to whether the offeror is, or is not, a foreign entity subject to the prohibitions of the statute or is, or is not, offering commercial satellite services provided by such a foreign entity. Further information is required if the offeror provides an affirmative response to any of the representations, but such affirmative response and further submission of information is expected to be extremely rare.

The rule does not duplicate, overlap, or conflict with any other Federal rules.

This rule will not have a significant economic impact on any small entities, unless they are offering commercial satellite services provided by a foreign entity that is subject to the restrictions of this rule. DoD was not able to identify any alternatives that would reduce the burden on small entities and meet the objectives of the rule.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (DFARS Case 2014–D010), in correspondence.

VI. Paperwork Reduction Act

The rule contains information collection requirements that required the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35). This information collection requirement is entitled *Foreign Commercial Satellite Services*.

A. Public reporting burden for this collection of information is estimated to average .25 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden estimated as follows:

Respondents: 380.

Responses per respondent: 1.

Total annual responses: 380.

Preparation hours per response: .25 hours.

Total response Burden Hours: 95.

B. Request for Comments Regarding Paperwork Burden.

Written comments and recommendations on the proposed information collection, including suggestions for reducing this burden, should be sent to Ms. Jasmeet Seehra at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503, or email Jasmeet_K_Seehra@omb.eop.gov, with a copy to the Defense

Acquisition Regulations System, Attn: (Amy G. Williams), OUSD(AT&L)DPAP/DARS, Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060. Comments can be received from 30 to 60 days after the date of this notice, but comments to OMB will be most useful if received by OMB within 30 days after the date of this notice.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the DFARS, and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Defense Acquisition Regulations System, Attn: Ms. Amy G. Williams, OUSD(AT&L)DPAP/DARS, Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060, or email osd.dfars@mail.mil. Include DFARS Case 2014–D010 in the subject line of the message.

VII. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary because to implement 10 U.S.C. 2279, as added by section 1602 of the National Defense Authorization Act for FY 2014 (Pub. L. 113–66), which was effective upon enactment (December 26, 2013). 10 U.S.C. 2279 restricts acquisition of commercial satellite services from certain foreign entities. Until this statute is implemented in the DFARS, there is risk that contracting officers may acquire commercial satellite services in violation of the law, and can create risk to the U.S. military and lost opportunities for the U.S. industrial base.

However, pursuant to 41 U.S.C. 1707 and FAR 1.501–3(b), DoD will consider public comments received in response to this interim rule in the formation of the final rule.
