DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Proposed Renewal of Existing Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Workers' Compensation Programs is soliciting comments concerning the proposed collection: Certification of Medical Necessity (CM-893). A copy of the proposed information collection request can be obtained by contacting the office listed below in the addresses section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before October 6, 2014.

ADDRESSES: Ms. Yoon Ferguson, U.S. Department of Labor, 200 Constitution Ave. NW., Room S-3201, Washington, DC 20210, telephone (202) 693-0701, fax (202) 693-1449, Email Ferguson.yoon@dol.gov. Please use only one method of transmission for comments (mail, fax, or Email).

SUPPLEMENTARY INFORMATION:

I. *Background:* The Office of Workers' Compensation Programs administers the Federal Black Lung Workers' Compensation Program. The enabling regulations of the Black Lung Benefits Act, at 20 CFR 725.701, establishes miner eligibility for medical services and supplies for the length of time required by the miner's condition and disability. 20 CFR.706 stipulates there

must be prior approval before ordering an apparatus where the purchase price exceeds \$300.00. 20 CFR 725.707 provides for the ongoing supervision of the miner's medical care, including the necessity, character and sufficiency of care to be furnished; gives the authority to request medical reports and indicates the right to refuse payment for failing to submit any reports required. Because of the above legislation and regulations, it was necessary to devise a form to collect the required information. The CM-893, Certificate of Medical Necessity is completed by the coal miner's doctor and is used by the Division of Coal Mine Worker's Compensation to determine if the miner meets impairment standards to qualify for durable medical equipment, home nursing, and/or pulmonary rehabilitation. This information collection is currently approved for use through December 30, 2014.

II. *Review Focus:* The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- * enhance the quality, utility and clarity of the information to be collected; and

- * minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. *Current Actions:* The Department of Labor seeks the approval for the extension of this currently-approved information collection in order to carry out its responsibility to determine the eligibility for reimbursement of medical benefits to Black Lung recipients.
