**Please Note:** Any member of the public interested in presenting oral comments to the

Committee must notify the Contact Person listed on this notice by 5:00 p.m. ET on Friday, September 12, 2014, with their request to present oral comments at the meeting. Interested individuals and representatives of organizations must submit a written/electronic copy of the oral statement/comments including a brief description of the organization represented by 5:00 p.m. ET on Wednesday, September 17, 2014.

Statements submitted will become a part of the public record. Only one representative of an organization will be allowed to present oral comments on behalf of that organization, and presentations will be limited to three to five minutes per speaker, depending on number of speakers to be accommodated within the allotted time. Speakers will be assigned a time to speak in the order of the date and time when their request to speak is received, along with the required submission of the written/electronic statement by the specified deadline. If special accommodations are needed, please email the Contact Person listed above.

In addition, any interested person may submit written comments to the IPRCC prior to the meeting by sending the comments to the Contact Person listed on this notice by 5:00 p.m. ET, Friday, September 19, 2014. The comments should include the name and, when applicable, the business or professional affiliation of the interested person. All written comments received by the deadlines for both oral and written public comments will be provided to the IPRCC for their consideration and will become part of the public record.

The meeting will be open to the public through a conference call phone number and webcast live on the Internet. Members of the public who participate using the conference call phone number will be able to listen to the meeting but will not be heard. If you experience any technical problems with the conference call or webcast, please call Operator Service on (301) 496–4517 for conference call issues and the NIH IT Service Desk at (301) 496–4357, toll free (866) 319–4357, for webcast issues.

Individuals who participate in person or by using these electronic services and who need special assistance, such as captioning of the conference call or other reasonable accommodations, should submit a request to the Contact Person listed on this notice at least seven days prior to the meeting.

As a part of security procedures, attendees should be prepared to present a photo ID during the security process to get on the NIH campus. For a full description, please see: <http://www.nih.gov/about/visitorsecurity.htm>.

Information about the IPRCC is available on the Web site: <http://iprcc.nih.gov/>.

#### Announcement of Requirements and Registration for “Follow that Cell” Challenge

**Authority:** 15 U.S.C. 3719.

**SUMMARY:** Through the “Follow that Cell” Challenge (the “Challenge”), the Single Cell Analysis Program (SCAP)—<http://commonfund.nih.gov/Singlecell/index>, a component of the National Institutes of Health Common Fund—<http://commonfund.nih.gov/about>, is searching for novel methods for analyzing dynamic states of individual cells that can serve as the basis for predicting alterations in cell behavior and function over time. The goal of the Challenge is to develop new tools and methods that allow time-dependent measurements at the single-cell level in a complex tissue environment in order to assess functional changes, provide information on the health status of a given cell, and help guide diagnosis and therapeutic treatments related to human disease states. Technological breakthroughs in this arena could allow researchers and physicians to identify rare cells in a mixed population, such as individual cells that can transform and become cancerous, cells that are latently infected with a pathogenic virus, or cells that develop resistance to drugs over time.

The NIH Common Fund currently supports SCAP grants, the majority of which are associated with academic institutions. This Challenge, structured in two phases, will strengthen and complement the existing SCAP grant portfolio by reaching out to a more diverse population of innovators and solvers, including not only those who are from academic institutions but also those who are from research and development communities in the private sector and those who are outside biomedical disciplines. The NIH believes this Challenge will stimulate investment from both public and private sectors in single-cell analysis research and product development, which, in
