

Solid Waste Sustainability Initiatives, including comments provided during formal comment and review periods. As a result of comments made on the Draft Environmental Impact Statement (DEIS), changes in the FEIS included the removal of site-specific locations for a proposed waste-to-energy plant, with analysis of the alternative now from a programmatic perspective only. The ROD contains a commitment to identify new potential sites and conduct further analysis, should the Army consider pursuing this type of technology in the future.

Implementation of this decision is expected to result in direct, indirect, and cumulative impacts to Fort Bliss. Environmental impacts are expected as a result of construction and operation of renewable energy technologies and conservation policies and procedures. The potential for significant environmental impacts is greatest for air quality, vegetation, archeological sites, soils, land use, and traffic. Of these, all but land use (as a result of converting training land to developed land) and soils (disturbance of up to 300 acres for construction of concentrating solar power arrays) are anticipated to be mitigable to less than significant. Potentially beneficial impacts are projected for air quality, energy demand and generation, socioeconomics, water supply sources, water demand, and wastewater reuse. To minimize the potential adverse impacts from implementation of the Proposed Action, the Army will mitigate these potential effects through a variety of strategies, as described in the ROD. All practicable means to avoid or minimize environmental harm from the selected alternatives have been adopted.

The selected alternative provides the necessary policies, procedures, and infrastructure upgrades to meet DoD requirements. The decision provides the proper balance of initiatives for the protection of the environment and supports the U.S. Army's Net Zero initiatives in concert with supporting on-going and future mission requirements.

The ROD contains a summary of the environmental impacts and rationale for the Army's decision.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3710-08-P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Termination of Environmental Impact Statement for Baryonyx Corporation, Inc.'s Proposed Wind Farm, Offshore, Willacy and Cameron Counties, TX

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The U.S. Army Corps of Engineers, Galveston District, Regulatory Branch is notifying interested parties that it has terminated the process to develop an Environmental Impact Statement (EIS) and has withdrawn the Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Section 404 of the Clean Water Act (33 U.S.C. 1344) permit application for the proposed Baryonyx Corporation, Inc. 300-turbine offshore wind farm located in the Gulf of Mexico state waters, offshore Willacy and Cameron Counties in state tracts: 1068, 1069, 1085, 1086, 1087, 1088, 1089, 1090, 1126, 1127, 1129, 1130 and 1131. The original Notice of Intent to Prepare and EIS was published in the **Federal Register** on Wednesday, March 14, 2012 (77 FR 15088).

FOR FURTHER INFORMATION CONTACT:

Questions regarding the termination of this EIS process should be addressed to: Jayson M. Hudson, U.S. Army Corps of Engineers, Regulatory Branch, P.O. Box 1229, Galveston, TX 77553-1229; (409) 766-3108; or *Email: SWG2011511@usace.army.mil*. Emailed question, including attachments, should be provided in .doc, .docx, .pdf or .txt formats.

SUPPLEMENTARY INFORMATION: The Galveston District published the original Notice of Intent to prepare an EIS for the proposed Baryonyx offshore wind farm (SWG-2011-00511) in the **Federal Register** on Wednesday, March 14, 2012 (77 FR 15088). After the initial public scoping process in March 2012, the Corps received 1156 substantive comments related to the applicant's proposal construction of approximately 300 offshore turbines in the Gulf of Mexico offshore Willacy and Cameron Counties, TX. Common concerns with the proposed project included potential impacts to migratory birds/bats, threatened and endangered species, marine resources (including essential fish habitat), navigation/transportation, terrestrial wildlife, socioeconomics, wetlands/submerged aquatic vegetation (SAV), other, including viewshed, water and sediment quality, terrestrial and

marine cultural, resources, offshore and onshore corridor analysis, coastal processes, recreation, storm surge, hazardous materials, air quality, noise, land use, geology, and coastal zone management. Based on comments submitted during this scoping process, the Corps began drafting an EIS in cooperation with the Environmental Protection Agency, National Park Service, and the U.S. Coast Guard; however, a draft EIS has not been published. By letter dated May 12, 2014, Baryonyx Corporation, Inc. requested withdrawal of their Department of the Army permit application. The applicant stated that their intent is to redefine the project and resubmit at a future date. Therefore, the Corps officially determined that it is appropriate to terminate the EIS. The Corps' neutral role in the EIS process was to evaluate the environmental consequences of the proposed project under the authority of Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. The preparation of the EIS was being conducted by a third-party contractor directed by the Corps, and funded by the applicant, which is typical of the Corps Regulatory EIS studies. Withdrawal of the permit application and termination of the EIS process will not prevent Baryonyx Corporation, Inc. from reapplying at a later date.

Brenda S. Bowen,

Army Federal Register Liaison Officer.
