

and surrounding acreage as a historic site open to the public under regulated access. The USCG concurs with the proposed disposition of the land. The conveyance is consistent with the Michigan Resource Management Plan Amendment approved June 27, 1997. The land is not needed for any Federal purpose and a conveyance to protect the historic structures and surrounding land would be in the public interest.

The conveyance document, if issued, would be subject to the provisions of the R&PP Act and applicable regulations of the Secretary of the Interior and would contain the following reservations, terms, and conditions:

1. Valid existing rights.
2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove minerals under applicable laws and such regulations as the Secretary of the Interior may prescribe.
3. Any other terms and conditions that the authorized officer deems appropriate, including conditions to ensure public access and proper management of Federal land and interest therein.

Commencing on August 19, 2014, the public land described above will be segregated from all forms of appropriation under the public land laws, except for conveyance under the Recreation and Public Purposes Act. For a period of 45 days after issuance of this notice, interested parties may submit written comments regarding the proposed conveyance or classification of the land to the Field Manager at the address listed above. Detailed information concerning this action including but not limited to documentation related to compliance with applicable environmental and cultural resource laws is available for review at the address listed above.

**Classification Comments:** Interested parties may submit comments involving the suitability of the land for R&PP Act classification, and particularly, whether the land is physically suited for management as a historic site, whether the use will maximize future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

**Application Comments:** Interested parties may submit comments regarding the specific use proposed in the application and the plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for management as a historic site. Any

adverse comments will be evaluated by the State Director who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification of the land described in this notice will become effective on October 20, 2014. The land will not become available for conveyance until after the classification becomes effective.

Clark County, a qualified applicant under the R&PP Act, has not applied for more than the 6,400-acre limitation consistent with the regulation at 43 CFR 2741.7(a)(1), and has submitted a statement in compliance with the regulation at 43 CFR 2741.4(b).

Interested parties may submit written comments on the suitability of the land for use as a park. Interested parties may
