

not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f). A prior environmental analysis checklist and a Categorical Exclusion Determination were completed for a regulation (USCG-2013-0548) issued for this same event in 2013. The previously completed environmental analysis checklist and Categorical Exclusion Determination can be found in the docket folder for USCG-2013-0548 at www.regulations.gov. Because this proposed rule is substantially unchanged from when the prior determination was issued for the 2013 event and there have been no new developments relevant to that determination, we have not completed a new environmental analysis checklist and Categorical Exclusion Determination for this proposed rule. We have made a preliminary determination this proposed rule will not have any of the following: Significant cumulative impacts on the human environment; substantial controversy or substantial change to existing environmental conditions; or inconsistencies with any federal, state, or local laws or administrative determinations relating to the environment. This proposed rule involves establishing a safety zone that will be enforced from 6 a.m. until 10 a.m. on October 26, 2014. This proposed rule is categorically excluded from further review under paragraph 34(g) of Figure 2-1 of the Commandant Instruction. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

B. Regulatory History and Information

SKW Constructors is constructing a new Midtown Tunnel in the Elizabeth River connecting Norfolk, VA to Portsmouth, VA. The project has been ongoing since 2011. This is the first stage of construction that requires a closure of the waterway.

C. Basis and Purpose

The legal basis for the rule is the Coast Guard's authority to establish regulated navigation areas and other limited access areas: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05-1, 6.04-1, 6.04-6, 160.5; Public Law 107-295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

Due to increased vehicle traffic in the Hampton Roads area, SKW Constructors, in concert with Elizabeth

River Crossings and the Virginia Department of Transportation, is constructing a second tunnel parallel to the existing Midtown Tunnel between Norfolk, VA and Portsmouth, VA. The construction will consist of submerging segments of the new Midtown Tunnel in the Elizabeth River. Due to the high volume of working vessels and submerged equipment, the Coast Guard proposes to close the Elizabeth River for twelve 48-hour periods to allow SKW Constructors to install the segments of the tunnel that overlap the federal channel. The Coast Guard proposes to establish a safety zone in a portion of the Elizabeth River between Elizabeth River Channel Buoy 31 (LLNR 9835) and Elizabeth River Channel Buoy 34 (LLNR 9835). The proposed closures will last 48 hours in length, with each respective period beginning on January 1, January 12, January 19, January 22, January 27, February 9, March 2, March 5, March 10, March 23, March 30 and April 6, 2015. The dates and hours are subject to change due to weather, scheduling conflicts, equipment failure and other unforeseen factors. Any changes to these dates will be listed in the Final Rule and communicated via marine information broadcasts.

D. Discussion of the Proposed Rule

The Captain of the Port of Hampton Roads proposes to establish a safety zone within the waters of the Elizabeth River, from Elizabeth River Channel Buoy 31 (LLNR 9835) to Elizabeth River Channel Buoy 34 (LLNR 9855) across the entire width of the channel, in the vicinity of Portsmouth, VA. This proposed safety zone will be enforced for twelve 48 hour periods beginning at midnight on January 1, January 12, January 19, January 22, January 27, February 9, March 2, March 5, March 10, March 23, March 30 and April 6, 2015. In the event of inclement weather that prevents the necessary work from taking place safely, each time period may be pushed back by up to 24 hours. Appropriate notifications will be made via marine information broadcasts in the event of a change in the schedule as soon as possible. Access to the safety zone will be restricted during the specified dates and times.

Except for vessels authorized by the Captain of the Port or his designated Representative, no person or vessel may enter or remain in the safety zone during the time frame listed. The Captain of the Port will give notice of the enforcement of the safety zone by all appropriate means to provide the widest dissemination of notice among the affected segments of the public. This will include publication in the Local

Notice to Mariners and Marine Information Broadcasts.

E. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders.

1. Regulatory Planning and Review

This proposed rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. The primary impact of these regulations will be on vessels wishing to transit the affected waterways during the safety zone on the Elizabeth River in the vicinity of Portsmouth, VA. Although these regulations prevent traffic from transiting a portion of the Elizabeth River during the construction, that restriction is limited in duration, affects only a limited area, and will be well publicized to allow mariners to make alternative plans for transiting the affected area.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule will not have a significant economic impact on a substantial number of small entities.

This proposed rule will affect the following entities, some of which might be small entities: The owners or operators of vessels intending to transit or anchor in specified waters of the Elizabeth River during the outlined timeframe.

This safety zone will not have a significant economic impact on a substantial number of small entities for the following reasons: (i) The safety zone will only be in place for a limited duration, (ii) before the enforcement period, maritime advisories will be issued allowing mariners to adjust their

plans accordingly, and (iii) the Captain of the Port may grant permission to transit through the zone on a limited basis.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

4. Collection of Information

This proposed rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This proposed rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children From Environmental Health Risks

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This proposed rule is not a “significant energy action” under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human

environment. This proposed rule involves the establishment of a safety zone. This proposed rule is categorically excluded from further review under paragraph 34-g of Figure 2-1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.
