**Submission for OMB Review: Comment Request**

*Title:* Innovative Strategies for Increasing Self-Sufficiency: Follow-Up Data Collections.

*OMB No.:* 0970-0397.

*Description:* The Administration for Children and Families (ACF), U.S. Department of Health and Human

Services (HHS), is proposing a data collection activity as part of the Innovative Strategies for Increasing Self-Sufficiency (ISIS) evaluation. ISIS is an evaluation of 9 promising career pathways strategies to promote education, employment, and self-sufficiency. The major goal of ISIS is to increase the empirical knowledge about the effectiveness of programs for low-income individuals and families to achieve educational credentials, attain employment and advance to positions that enable self-sufficiency.

ISIS is one project within the broader portfolio of research that OPRE is utilizing to assess the success of the career pathways programs and models. In addition to ISIS, this strategy includes a multi-pronged research and evaluation approach for the Health Profession Opportunity Grants (HPOG) Program to better understand and assess the activities conducted and their results. In order to maximize learning across this portfolio, survey development for the HPOG and ISIS baseline and follow up surveys is being coordinated, and the majority of the data elements collected in these surveys are similar.

Two data collection efforts have been approved for ISIS, including one for baseline data collection (approved November 2011), a second for data collection activities to document program implementation, data collection activities for an initial follow-up survey of participants to be administered approximately 15 months after random assignment, and data collection through in-depth interviews for a small sample of study participants (approved August 2013). Additionally, three related data collection efforts for HPOG research were approved by OMB under OMB #0970-0394. These include approval of a Performance Reporting System (PRS) (approved September 2011), for collection of additional

baseline data for the HPOG-Impact study (approved October 2012), and for collection of data for the National Implementation Evaluation (approved August 2013). Additionally, a new request is being submitted at the same time as this request.

This **Federal Register** Notice provides the opportunity to comment on a proposed new information collection activity for ISIS—a second follow-up survey for ISIS participants approximately 36 months after program enrollment. The purpose of the survey is to follow-up with study participants to document their education and training experiences, employment experiences, and parenting practices and child outcomes for participants with children.

Data collection activities to submit in a future information collection request include a third follow-up survey for ISIS study participants approximately 60 months after study enrollment.

Previously approved collection activities under 0970-0397 will continue under this new request, including additional data collection using the following previously approved instruments: The Basic Information Form; the Self-Administered Questionnaire; 15-Month Follow-Up Survey; 15-Month Follow-Up Survey Tracking Letters; Study Participant In-depth Interview Guide; and Study Participant Check-in Call. The estimated number of study participants for the 15-Month Survey and in-depth interviews is reduced from the previous OMB submission. Total sample size targets were reduced at a number of ISIS program sites to reflect actual study enrollment experiences. The number of in-depth interviews projected was also reduced to incorporate experiences to date recruiting participants.

*Respondents:* Individuals enrolled in the ISIS study.

**ANNUAL BURDEN ESTIMATES**

[This information collection request is for a three-year period]

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
<b>Previously Approved Instruments</b>					
Baseline data collection: Basic Information Form .....	24	8	1	.25	2
Baseline data collection: Self-administered Questionnaire .....	24	8	1	.33	3
15 Month Follow-up Survey .....	2,900	967	1	0.833	805
Study Participant In-depth Interview Guide .....	144	48	1	1	48
Study Participant Check-in Call .....	144	48	1	.16	8
<b>Current Request for Approval</b>					
36-Month Follow-up Survey .....	7,386	2,462	1	1	2,462

*Estimated Total Annual Burden Hours:* 3,328.

Additional Information: Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 370 L'Enfant Promenade SW., Washington, DC 20447, Attn: OPRE Reports Clearance Officer. **Submission for OMB Review; Comment Request**

*Title:* Health Profession Opportunity Grants (HPOG) program.

*OMB No.:* 0970-0394.

*Description:* The Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) is proposing data collection activities as part of the Health Profession Opportunity Grants (HPOG) program. The proposed data collection activities described in this notice will provide data for the Impact Studies of the Health Profession Opportunity Grants (HPOG-Impact) and the National Implementation Evaluation of the Health Profession Opportunity Grants to

Serve TANF Recipients and Other Low-Income Individuals (HPOG-NIE).

The goal of HPOG-Impact is to evaluate the effectiveness of approaches used by 20 of the HPOG grantees to provide TANF recipients and other low-income individuals with opportunities for education, training and advancement within the health care field. HPOG-Impact also is intended to evaluate variation in participant impact that may be attributable to different HPOG program components and models. The impact study design is a classic experiment in which eligible applicants will be randomly assigned to a treatment group that is offered participation in HPOG and a control group that is not permitted to enroll in HPOG. In a subset of sites, eligible applicants will be randomized into two treatment arms (a basic and an enhanced version of the intervention) and a control group.

The goal of HPOG-NIE is to describe and assess the implementation, systems change, and outcomes and other important information about the operations of the 27 HPOG grantees focused on TANF recipients and other low-income individuals. To achieve these goals, it is necessary to collect information about the composition and intensity of services received, participant characteristics and HPOG experiences, and participant outputs and outcomes.

HPOG-Impact and HPOG-NIE are two projects within the broader portfolio of research that OPRE is utilizing to assess the success of the career pathways programs and models. This strategy includes a multi-pronged research and evaluation approach for the HPOG program to better understand and assess the activities conducted and their results as well as the Innovative Strategies for Improving Self-Sufficiency (ISIS) project. In order to maximize learning across the portfolio, survey development for the HPOG and ISIS baseline and follow up surveys is being coordinated, and the majority of the data elements collected in these surveys are similar.

Three data collection efforts related to HPOG research were approved by OMB, including approval of a Performance Reporting System (PRS) (approved

September 2011), for collection of additional baseline data for the HPOG-Impact study (approved October 2012), and for collection of data for the National Implementation Evaluation (approved August 2013). Additionally, two data collection efforts for ISIS were approved (November 2011 and August 2013), and a new request is being submitted at the same time as this request (under OMB #0970-0397).

This Federal Register Notice provides the opportunity to comment on proposed new information collection activities for HPOG-Impact and HPOG-NIE: (1) *The HPOG-Impact second follow-up survey (at 36 months post-random assignment) of both treatment and control group members.* The purpose of the HPOG-Impact 36 month follow-up survey is to follow-up with study participants to document their education and training experiences, employment experiences, and parenting practices and child outcomes for participants with children. (2) *A HPOG-NIE screening questionnaire and semi-structured discussion guide for use in interviews with grantees about their use of performance measurement information.*

*Data collection activities to submit in a future information collection request include:* A third follow-up survey for HPOG-Impact study participants approximately 60 months after study enrollment.

Previously approved collection activities under 0970-0394 will continue this new request, including additional data collection using the following previously approved instruments: The Performance Reporting System (PRS); the HPOG-Impact 15-month follow-up survey of treatment and control group members; and the HPOG-NIE 15-month Participant Follow-Up survey.

*Respondents:* Individuals enrolled in HPOG interventions and control group members; HPOG program managers and staff.

**Annual Burden Estimates**

Estimated Total Annual Burden Hours:

[This information collection request is for a three-year period.]

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
Previously Approved Instruments					
PRS .....	32	11	4	31.2	1,373
HPOG-Impact 15-month Participant Follow-Up survey .....	5,600	1,867	1	0.7	1,307
