SUPPLEMENTARY INFORMATION: The Forest Service proposes to amend its internal Agency directives for Watershed and Air Management to establish direction for management of groundwater resources on National Forest System (NFS) lands as an integral component of watershed management. Specifically, the proposed amendment would provide direction on the consideration of groundwater resources in agency activities, approvals, and authorizations; encourage source water protection and water conservation; establish procedures for reviewing new proposals for groundwater withdrawals on NFS lands; require the evaluation of potential impacts from groundwater withdrawals on NFS resources; and provide for measurement and reporting for some larger groundwater withdrawals. This proposed amendment would supplement existing special uses and minerals and geology directives to address issues of groundwater resource management and would help ensure

consistent and adequate analyses for evaluating potential uses of NFS lands that could affect groundwater resources. Public comment is invited and will be considered in development of the final directive. The Forest Service wants to ensure that there is sufficient time for potentially affected parties, including States, to comment. Thus the Agency is providing an extended comment period for the proposed directive.

In addition, the Forest Service may host meetings and/or webinars as needed on the proposed directive to present information and answer questions on the proposed policy and the comment process during the comment period. Specific information regarding the dates and times of the webinar will be announced by news release and at the following Web site: <http://www.fs.fed.us/geology/groundwater>. A recording of the webinar may also be posted on the Web site.

Reviewers may obtain a copy of the proposed directive from the Forest Service Minerals and Geology Management Staff Web site, <http://www.fs.fed.us/geology/groundwater>, or from the Regulations.gov Web site, <http://www.regulations.gov>.
