

(5) Short biography of nominee, including credentials and proof of U.S. citizenship (copy of birth certificate and/or U.S. passport) and a list of citizenships of foreign countries.

(6) Brief description of the organization and its business activities, including.

(7) Company size (number of employees and annual sales).

(8) Exporting experience.

(9) An affirmative statement that the nominee will be able to meet the expected time commitments of Committee work. Committee work includes (1) attending in-person committee meetings approximately four times per year, (2) undertaking additional work outside of full committee meetings including subcommittee conference calls or meetings as needed, and (3) drafting or commenting on proposed recommendations to be evaluated at Committee meetings.

Please do not send company or trade association brochures or any other information.

FOR FURTHER INFORMATION CONTACT: Ms. Maureen Hinman, Office of Energy & Environmental Industries (OEEI), International Trade Administration, Room 4053, 1401 Constitution Avenue NW., Washington, DC 20230. (Phone: 202-482-0627; Fax: 202-482-5665; email: maureen.hinman@trade.gov).

Edward A. O'Malley,

Director, Office of Energy and Environmental Industries.

BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

National Ocean and Atmospheric Administration

Proposed Information Collection; Comment Request; Regional Economic Data Collection Program for Southwest Alaska

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before November 4, 2014.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at Jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Chang Seung, (206) 526-4250 or Chang.Seung@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

Regional or community economic analysis of proposed fishery management policies is required by the Magnuson-Stevens Fishery Conservation and Management Act, National Environmental Policy Act, and Executive Order 12866, among others. To satisfy these mandates and inform policymakers and the public of the likely regional economic impacts associated with fishery management policies, appropriate economic models and the data to implement them are needed. Much of the data required for regional economic analysis of Southwest Alaska fisheries are either unavailable or unreliable. Accurate fishery-level data on employment, labor income, and expenditures in the Southwest Alaska fishery and related industries are not generally available but are needed to estimate the role of fisheries and effects of fishery policies on local, regional and national economies. The Southwest region for this survey includes six boroughs and census areas (BCAs)—Aleutians East Borough, Aleutians West Census Area, Bristol Bay Borough, Dillingham Census Area, Lake and Peninsula Borough, and Kodiak Island Borough.

In 2007–2008, a similar data collection project was administered for the Southwest Alaska region by obtaining 2006 annual data. However, that data is now outdated and incomplete. In the proposed survey, 2013 or 2014 annual data for important regional economic variables will be collected from fish harvesting and seafood processing businesses operating in the region (2012 data on these variables will be collected if more recent vessel landings and processed products data are not available at the time the data collection begins). The data will be used to develop Southwest regional and

BCA-level models that will provide more reliable impact estimates and significantly improve policymakers' ability to assess effects on fishery-dependent communities in Southwest Alaska. A departure from the prior survey effort is that more information will be collected this time on the source locations of business expenditures by catcher vessels and seafood processors. The survey will be conducted one time only.

A mail survey will be used to collect data on employment, labor income, and expenditures from owners of 2,731 catcher vessels whose boats delivered fish to Southwest Alaska processors. Key informant interviews will be conducted to gather additional information from 30 seafood processors, including catcher-processor and floating processor vessels, and 20 local businesses that supply inputs to regional fish harvesters and seafood processors. The interviews will be used to determine relative expenditures for inputs made in nine geographical areas—(1) each of the six BCAs within the Southwest region, (2) non-Southwest Alaska region, (3) West Coast, and (4) the rest of US and elsewhere. Personal interviews with input suppliers will gather additional information on (i) the level of supplier sales to regional seafood industry businesses, and (ii) the portion of business expenditures for labor and non-labor inputs that were made in each of the above nine geographical areas.

II. Method of Collection

Mail surveys and personal or phone interviews will be used.

III. Data

OMB Control Number: 0648-xxxx.

Form Number(s): None.

Type of Review: Regular submission (new information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,415.

Estimated Time per Response: 45 minutes.

Estimated Total Annual Burden Hours: 1,061.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden

(including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 29, 2014.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XC598

Endangered and Threatened Species; Draft Recovery Plan for Staghorn and Elkhorn Corals

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the availability for public review of the draft Recovery Plan (Plan) for elkhorn coral (*Acropora palmata*) and staghorn coral (*Acropora cervicornis*). The Plan is available on the NMFS Web site at <http://www.nmfs.noaa.gov/pr/recovery/plans.htm> and the Southeast Regional Office Web site at http://sero.nmfs.noaa.gov/protected_resources/coral/elkhorn_coral/document/Key_Docs/DraftAcroporaRecoveryPlan.pdf. NMFS is soliciting review and comment from the public and all interested parties on the draft Plan, and NMFS will consider all relevant, substantive comments received during the review period before finalizing the Plan.

DATES: Comments on the draft Plan must be received by close of business on October 20, 2014.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2014-0110, by any of the following methods:

- **Electronic Submissions:** Submit all electronic public comments via the Federal e-Rulemaking Portal www.regulations.gov. To submit comments via the e-Rulemaking Portal, first click the “submit a comment” icon, then enter NOAA-NMFS-2014-0110 in the keyword search. Locate the document you wish to comment on from the resulting list and click on the “Submit a Comment” icon on the right of that line.

- **Mail:** Assistant Regional Administrator for Protected Resources, NMFS, Southeast Regional Office, 263 13th Avenue South, St. Petersburg, FL 33701. Attn: Draft Acropora Recovery Plan.

Instructions: Comments must be submitted by one of the above methods to ensure that the comments are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Alison Moulding (727-824-5312), email Alison.Moulding@noaa.gov or Therese Conant (301-427-8456), email Therese.Conant@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

Recovery plans describe actions beneficial for the conservation and recovery of species listed under the Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*). Section 4(f)(1) of the ESA requires that recovery plans incorporate, to the maximum extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the Plan’s goals; and (3) estimates of the time required and costs to implement recovery actions. The ESA requires the

development of recovery plans for each listed species unless such a plan would not promote its conservation.

The purpose of this draft Plan is to rebuild and assure the long-term viability of elkhorn and staghorn coral populations in the wild, allowing ultimately for the species’ removal from the federal list of endangered and threatened species. The goal of this Plan is to increase the abundance and to protect the genetic diversity of elkhorn and staghorn coral populations throughout their geographical ranges while sufficiently abating threats to warrant delisting of both species. Elkhorn and staghorn coral populations should be large enough to include numerous groups of successfully reproducing individuals, including thickets, across the historical range of these species. These groups should be large enough to protect genetic diversity and maintain ecosystem function. The proposed recovery approach includes research and monitoring to identify, reduce, or eliminate threats so the recovery objectives outlined in this Plan have the greatest likelihood of being achieved. Because some threats to elkhorn and staghorn corals cannot be directly managed (e.g., disease), the Plan pursues concurrent actions to address both global and local threats. Population enhancement is also an integral part of elkhorn and staghorn recovery through restoration, restocking, and active management. Ecosystem-level actions are identified to improve habitat quality and restore community structure and ecological functions, such as herbivory, to sustain adult colonies and enable successful recruitment in the wild over the long term. The goal, objectives, and criteria of the Plan represent NMFS’ expectation of conditions to recover elkhorn and staghorn corals so they no longer need the protective measures provided by the ESA; conservation of elkhorn and staghorn species is described in the Plan regardless of their listing as an endangered or threatened species.

The recovery criteria in the draft Plan are based on the current literature and expert consensus. In some cases, the current best available information is so limited that it is not practicable to identify recovery criteria. Instead, interim criteria are identified to gather and obtain the information necessary to establish final recovery criteria. Recovery criteria can be viewed as targets, or values, by which progress toward achievement of recovery objectives can be measured. In the Plan we frame recovery criteria both in terms of population parameters (Population-based Recovery Criteria) and the five
