History and Description of the Remains

At an unknown date prior to 1921, human remains representing, at minimum, one individual were removed from an unknown grave in Pequaming in Baraga County, MI, by Mr. Morgan Hebard, a summer resident of Pequaming. Hebard subsequently donated the human remains to the Academy of Natural Sciences of Philadelphia in 1921. In 1936, the human remains were loaned to the University of Pennsylvania Museum of Archaeology and Anthropology. In 1997, the remains were formally gifted to the University of Pennsylvania. The human remains consist of three cranial fragments (temporal, parietal, and occipital bones) of one adult male. No known individuals were identified. No associated funerary objects are present.

Museum and collector documentation indicate that the human remains have been dated to the early Historic Period. Consultation, published information, and land cessions associated with Baraga County indicate that the geographic location from which the remains were removed is aboriginal to the Chippewa tribe or people.
