Lock + Hydro Friends Fund XLVI; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On April 1, 2014, Lock + Hydro Friends Fund XLVI filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Hildebrand Lock & Dam Project (Hildebrand Project or project) to be located at the U.S. Army Corps of Engineers' (Corps) Hildebrand Lock and Dam on the Monongahela River in Monongahela County, West Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A new 55-foot-long by 40-foot-high Large Frame Module (LFM); (2) two pre-fabricated concrete walls if needed; (3) a new 50-foot-wide by 100-foot-long tailrace; (4) five low-head modular bulb hydroelectric turbine-generators each rated at 1.5 megawatts; (5) a low-voltage, 36.7-kilovolt (kV) distribution line from the generator to the new switchyard; (6) a new 25-foot-wide by 50-foot-long switchyard; and (7) a new 69-kV transmission line approximately 1,000 feet long from the new switchyard to an existing substation. The estimated annual generation of the Hildebrand Project would be 66,974 megawatt-hours.
