Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Industrial, Commercial, and Institutional Boilers and Process Heaters apply to existing and new industrial, commercial, and institutional boilers and process heaters located at major sources of HAP. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They

are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. Any owner/operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of industrial, commercial, and institutional boilers and process heaters.

Respondent's obligation to respond:

Mandatory (40 CFR Part 63, Subpart DDDDD).

Estimated number of respondents: 1,778 (total).

Frequency of response: Initially, semiannually, annually, and biennially.

Total estimated burden: 492,702 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$155,628,678 (per year), which includes \$108,235,205 in both annualized capital and operation & maintenance costs combined.

Abstract: Subtitle I of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for Underground Storage Tank (UST) systems as may be necessary to protect human health and the environment, and procedures for approving state programs in lieu of the federal program. EPA promulgated technical and financial requirements for owners and operators of USTs at 40 CFR part 280, and state program approval procedures at 40 CFR part 281. This ICR is a comprehensive presentation of all information collection requirements contained at 40 CFR parts 280 and 281.

The data collected for new and existing UST system operations and financial requirements are used by owners and operators and/or EPA or the implementing agency to monitor results of testing, inspections, and operation of UST systems, as well as to demonstrate compliance with regulations.

Form Numbers: None.

Respondents/affected entities: Owners and operators of USTs.

Respondent's obligation to respond: Mandatory per 40 CFR Parts 280 and 281.

Estimated number of respondents: 211,686.

Frequency of response: Once and on occasion.

Total estimated burden: 5,068,897 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$375,584,849 (per year), includes \$223,435,559 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1,684,661 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an update in the respondent universe and burden estimates based on updated data from the Office of Underground Storage Tanks (OUST) and the regulated community. EPA also slightly reduced the burden associated with notification requirements.

Acting Director, Collection Strategies Division.
