Abstract: Subtitle I of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for Underground Storage Tank (UST) systems as may be necessary to protect human health and the environment, and procedures for approving state programs in lieu of the federal program. EPA promulgated technical and financial requirements for owners and operators of USTs at 40 CFR part 280, and state program approval procedures at 40 CFR part 281. This ICR is a comprehensive presentation of all information collection requirements contained at 40 CFR parts 280 and 281.

The data collected for new and existing UST system operations and financial requirements are used by owners and operators and/or EPA or the implementing agency to monitor results of testing, inspections, and operation of UST systems, as well as to demonstrate compliance with regulations.

Form Numbers: None.

Respondents/affected entities: Owners and operators of USTs.

Respondent's obligation to respond: Mandatory per 40 CFR Parts 280 and 281.

Estimated number of respondents: 211,686.

Frequency of response: Once and on occasion.

Total estimated burden: 5,068,897 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$375,584,849 (per year), includes \$223,435,559 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1,684,661 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an update in the respondent universe and burden estimates based on updated data from the Office of Underground Storage Tanks (OUST) and the regulated community. EPA also slightly reduced the burden associated with notification requirements.
