

sample selected from police reported motor vehicle traffic crashes. Specifically, crashes involving at least one motor vehicle in transport on a trafficway that result in property damage, injury or a fatality will be included in the CRSS sample. The crash reports sampled will be chosen from selected areas that reflect the geography, population, miles driven, and the number of crashes in the United States. No additional data beyond the selected crash reports will be collected. Once the crash reports are received they will be coded and the data will be entered into the CRSS database.

CRSS will acquire national information on fatalities, injuries and property damage directly from existing State police crash reports. The user population includes Federal and State agencies, automobile manufacturers, insurance companies, and the private sector. Annual changes in the sample parameters are minor in terms of operation and method of data collection, and do not affect the reporting burden of the respondent. CRSS data coders will utilize existing State crash files.

*Estimated Annual Burden:* 34,944 hours.

*Number of Respondents:* 630.

Since its creation in 1994, the CDFI Fund has awarded over \$1.9 billion to CDFIs, community development organizations, and financial institutions through the Community Development Financial Institutions Program (CDFI Program), the Native American CDFI Assistance Program (NACA Program), the Bank Enterprise Award Program (BEA Program), the Capital Magnet Fund, and the Financial Education and Counseling
