

## BILLING CODE 5001-06-C

Transmittal No. 14-44

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser*: Poland

(ii) *Total Estimated Value*:

Major Defense Equipment * ..	\$270 million
Other .....	\$230 million

TOTAL .....	\$500 million
-------------	---------------

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase*: 40 AGM-158A Joint Air-to-Surface Standoff Missiles (JASSM), 2 AGM-158A JASSM Live with Test Instrumentation Kit (TIK) and Flight Termination Systems (FTS), 2 AGM-158A JASSM Inert with TIK and FTS, and 2 Flight Certification Test Vehicles. Also included: Operational Flight Plan upgrade to M6.5 tape for the Polish F-16C/D Block 52 aircraft to include JASSM integration, missile containers, spare and repair parts, support and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, technical, and logistics support services, and other related elements of logistical and program support.

(iv) *Military Department*: Air Force (YAB)

(v) *Prior Related Cases, if any*: FMS case SAC and amendments-\$3.5B-23Apr03

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex

(viii) *Date Report Delivered to Congress*: 17 Sep 14

\* As defined in Section 47(6) of the Arms Export Control Act.

## POLICY JUSTIFICATION

*Poland—Joint Air-to-Surface Standoff Missiles and F-16 Operational Flight Plan Upgrade*

The Government of Poland has requested a possible sale of 40 AGM-158A Joint Air-to-Surface Standoff Missiles (JASSM), 2 AGM-158A JASSM Live with Test Instrumentation Kit (TIK) and Flight Termination Systems (FTS), 2 AGM-158A JASSM Inert with TIK and FTS, and 2 Flight Certification Test Vehicles. Also included: Operational Flight Plan upgrade to M6.5 tape for the Polish F-16C/D Block 52 aircraft to include JASSM integration, missile

containers, spare and repair parts, support and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, technical, and logistics support services, and other related elements of logistical and program support. The estimated cost is \$500 million.

The proposed sale will contribute to the foreign policy and the national security objectives of the United States by helping to improve the security of a NATO ally. Poland continues to be an important force for political stability and economic progress in Central Europe.

The proposed sale will improve Poland's capability to meet current and future threats of enemy air and ground weapons systems. Poland will use the enhanced capability as a deterrent to regional threats and to strengthen its homeland defense. These weapon and capability upgrades will allow Poland to strengthen its air-to-ground strike capabilities and increase its contribution to future NATO operations.

The proposed sale of the weapons, equipment, and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin in Ft. Worth, Texas. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 14-44

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The AGM-158 is a 200+ nautical mile range low-observable, highly survivable subsonic cruise missile designed to penetrate next generation air defense systems en route to target. It is designed to kill hard, medium-hardened, soft and area type targets. It uses a Selective Availability Anti-Spoofing Module based Global Positioning System (GPS) receiver and a scene matching infrared seeker that uses a wire-frame Terminal Area Model (TAM) of the target area to hit fixed and relocatable targets with greater accuracy

than GPS alone. Classification of the technical data and information on the AGM-158's performance, capabilities, systems, sub-systems, operations, and maintenance will range from Unclassified to Secret. The highest level of classified information required for training, operation and maintenance is Secret.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the recipient country can provide the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to Poland.

ARLINGTON, VA 22202-5408

Honorable John A. Boehner  
Speaker of the House  
U.S. House of Representatives  
Washington, DC 20515

SEP 19 2014

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 14-32, concerning the Department of the Army's proposed Letter(s) of Offer and Acceptance to Pakistan for defense articles and services estimated to cost \$198 million. After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

J. W. Rixey  
Vice Admiral, USN  
Director

#### **POLICY JUSTIFICATION**

##### ***Pakistan—Mine Resistant Ambush Protected (MRAP) Vehicles***

The Government of Pakistan has requested a possible sale of 160 Navistar Mine Resistant Ambush Protected (MRAP) vehicles to include (110 MaxxPro Dash DXM, 30 MaxxPro Base DXM, 10 MaxxPro Dash DXM Ambulances, and 10 MaxxPro Recovery Vehicles with protection kits), spare and repair parts, support and test equipment, publications and technical documentation, personnel training and equipment training, U.S. Government and contractor engineering, technical and logistics support services, and other related elements of logistical and program support. The estimated cost is \$198 million.

The proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a country vital to U.S. foreign policy and national security goals in South Asia.

The proposed sale of MRAPs will ensure that Pakistan can effectively operate in hazardous areas in a safe, enhanced survivability vehicle, and improves Pakistan's interoperability with U.S. forces. By acquiring this capability, Pakistan will be able to provide the same level of protection for its own forces as the United States provides for its forces. Pakistan, which currently possesses MRAPs, has successfully demonstrated the ability to operate and maintain the vehicles in counterinsurgency and counterterrorism operations, and will have no difficulty absorbing these additional vehicles into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractor will be Navistar Defense Corporation in

Madison Heights, Michigan. There are no known offset agreements proposed in connection with this potential sale.

Implementation of the proposed sale will require approximately two (2) U.S. Government and twenty-four (24) contractor representatives in Pakistan for a period of approximately 18 months to perform inspections and de-processing of vehicles upon delivery; provide assistance in installation of vehicle accessory kits; provide fault diagnosis and repairs; perform corrective maintenance, to include accident and battle damage assessment and repairs; conduct operator and maintainer training; and conduct inventories and maintain accountability of USG provided material.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 14–32

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

#### **(vii) *Sensitivity of Technology:***

1. The Mine Resistant Ambush Protected (MRAP) vehicle is an armored, multi-purpose combat vehicle designed to support mounted urban operations to include convoy security support and dismounted patrols. It is designed to increase crew survivability. The vehicle has a blast-resistant underbody designed to protect the crew from mine blasts, fragmentation, and direct fire weapons.

2. All MRAP vehicle information needed to operate, train, and maintain the vehicles is Unclassified; some design and test data, design performance parameters, armoring methodology, vulnerabilities, armor types and configuration data are classified up to Secret.

3. If a technologically advanced adversary were to obtain knowledge of the design performance and functional characteristics of specific hardware and software elements, the information

could be used to develop countermeasures which might reduce the weapon system's effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient country can provide the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Pakistan.
