

New Jersey and Jamaica Bay in New York. Under this collection effort, the NOAA Office for Coastal Management will implement a contingent valuation survey to assess the value of the ecosystem services that will be generated by restoration projects being implemented in both areas. Data will be collected from individuals who reside in the New York and New Jersey areas. NOAA will implement two separate surveys: One for each geographic area.

There are a number of restoration projects that are ongoing in the Forsythe National Wildlife Refuge and in Jamaica Bay. After reviewing the scope and focus of many of those restoration projects, NOAA has decided to focus on two specific projects. For the Forsythe National Wildlife Refuge, NOAA will focus on the work being done under a \$15 million project being conducted by the U.S. Fish and Wildlife Service. The Forsythe project will focus on restoring and enhancing the salt marsh at the Refuge to act as a natural protection from storms and to act as a habitat for wildlife. In assessing ecosystem service benefits for the Forsythe restoration work, NOAA will focus on the value of the salt marsh for storm protection, habitat, and recreation, as well as other possible ecosystem services.

The Jamaica Bay area has a number of planned and ongoing projects. NOAA has decided to focus on work being conducted at Spring Creek Park on the northern point of Jamaica Bay. The restoration work at the park will involve improving habitat and storm and flood protection. NOAA will focus on the associated ecosystem services from habitat improvements and the added storm and flood protection.

NOAA is currently contacting and working with partners and stakeholders at each site to ensure the relevancy of this work.

## II. Method of Collection

NOAA will collect these data using a web-based survey instrument and will be using an online panel. The panel will consist of individuals who reside in the two areas. A number of firms maintain online panels to use in survey efforts. These firms recruit individuals to be part of the panels and target their recruitment efforts to develop panels that are representative of the general population. Individuals who are part of these panels have agreed to participate in online surveys. To access the panel, NOAA will contract with one of the firms who maintains an online panel.

## III. Data

OMB Control Number: 0648-xxxx.  
Form Number(s): None.

*Type of Review:* Regular submission (request for a new information collection).

*Affected Public:* Individuals and households.

*Estimated Number of Respondents:* 400.

*Estimated Time per Response:* 20 minutes.

*Estimated Total Annual Burden Hours:* 134 hours.

*Estimated Total Annual Cost to Public:* \$0 in capital and reporting/recording costs.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: October 16, 2014.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Catcher Processor Socio-Cultural Study

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before December 22, 2014.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 66165, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [Jjessup@doc.gov](mailto:Jjessup@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument and instructions should be directed to Amber Himes-Cornell, (206) 526-4221 or [amber.himes@noaa.gov](mailto:amber.himes@noaa.gov).

## SUPPLEMENTARY INFORMATION:

### I. Abstract

This request is for a new information collection.

Historically, changes in fisheries management regulations have been shown to result in impacts to individuals within the fishery. An understanding of social impacts in fisheries—achieved through the collection of data on fishing communities, as well as on individuals who fish—is a requirement under several federal laws. Laws such as the National Environmental Policy Act (NEPA) and the Magnuson-Stevens Fishery Conservation and Management Act (MSA) (as amended 2007) describe such requirements. The collection of this data not only helps to inform legal requirements for the existing management actions, but will inform future management actions requiring equivalent information.

Fisheries rationalization programs have an impact on those individuals participating in the affected fishery, as well as their communities and may also have indirect effects on other fishery participants. The North Pacific Fishery Management Council is considering the implementation of a new, yet to be defined, rationalization program for the Gulf of Alaska groundfish trawl fishery. A data collection was conducted in 2014 (OMB Control No. 0648-0685) to obtain relevant socio-cultural information about current participants in most sectors of this fishery.

The proposed data collection complements this 2014 effort by collecting comparable information from individuals participating in the catcher processor fleet that operates in the North Pacific. The data collected will be used to develop a baseline description of the catcher processor sector operating in the North Pacific that can be used to analyze impacts that future fisheries management changes, such as the new bycatch management changes being

developed for the Gulf of Alaska trawl fishery, may have on catcher processor businesses, as well as individuals and communities that are dependent on this sector. The measurement of these changes, combined with those noted in the 2014 survey, will lead to a greater understanding of the social impacts new management measures may have on the individuals and communities.

## II. Method of Collection

Data collection will be undertaken through the use of a survey instrument. Data will be collected using a mixed method approach through a combination of paper surveys, electronic surveys, and in-person interviews to obtain the greatest breadth of information as possible.

## III. Data

*OMB Control Number:* 0648-xxxx.

*Form Number:* None.

*Type of Review:* Regular submission (request for a new information collection).

*Affected Public:* Individuals or households; business or other for-profit organizations.

*Estimated Number of Respondents:* 435.

*Estimated Time per Response:* 20–30 minutes.

*Estimated Total Annual Burden Hours:* 160 hours.

*Estimated Total Annual Cost to Public:* \$0 in recordkeeping/reporting costs.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: October 16, 2014.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648-XD562**

#### Endangered and Threatened Species; Initiation of a Status Review for the Guadalupe Fur Seal

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

**ACTION:** Notice of initiation of a status review; request for information.

**SUMMARY:** The National Marine Fisheries Service (NMFS) announces a status review of the Guadalupe fur seal (*Arctocephalus townsendi*) under the Endangered Species Act of 1973 (ESA). A status review is a periodic undertaking conducted to ensure that the listing classification of a species is accurate. A status review is based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any such information on the Guadalupe fur seal population in the eastern Pacific waters that has become available since the last Guadalupe fur seal status review in 1984.

**DATES:** To allow us adequate time to conduct these reviews, we must receive your information no later than December 22, 2014. However, we will continue to accept new information about any listed species at any time.

**ADDRESSES:** You may submit comments on this document, identified by NOAA-NMFS-2014-0131, by any of the following methods:

1. *Electronic Submissions:* Submit all electronic public comments via the Federal e-Rulemaking Portal [www.regulations.gov](http://www.regulations.gov). To submit comments via the e-Rulemaking Portal, first click the "submit a comment" icon, then enter NOAA-NMFS-2014-0131 in the keyword search. Locate the document you wish to comment on from the resulting list and click on the "Submit a Comment" icon on the right of that line.

2. *Facsimile (fax):* 562-980-4027, Attn: Christina Fahy.

3. *Mail or hand-delivery:* Christina Fahy, National Marine Fisheries Service, West Coast Regional Office, 501

West Ocean Blvd.; Suite 4200; Long Beach, California 90802.

*Instructions:* Comments must be submitted by one of the above methods to ensure that the comments are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel, WordPerfect, or Adobe PDF file formats only.

**FOR FURTHER INFORMATION CONTACT:** Christina Fahy, West Coast Region, 562-980-4023.

**SUPPLEMENTARY INFORMATION:** Section 4(c)(2)(A) of the ESA requires that we conduct a review of listed species at least once every five years. On the basis of such reviews under section 4(c)(2)(B), we determine whether a particular species should be removed from the list (delisted), or reclassified from endangered to threatened, or from threatened to endangered. Delisting a species must be supported by the best scientific and commercial data available, substantiating that the species is neither endangered nor threatened for one or more of the following reasons: (1) The species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error. Any change in Federal classification would require a separate rulemaking process. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species currently under active review. This notice announces active review of the Guadalupe fur seal, currently listed globally as threatened.

#### Public Solicitation of New Information

To ensure that the review is complete and based on the best available scientific and commercial information, we are soliciting new information from the public, relevant governmental agencies, tribes, the scientific
