SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) United States

Coast Guard (USCG) proposes to update and reissue a current DHS system of records titled, “DHS/USCG—029 Notice of Arrival and Departure System of Records.” The collection and maintenance of this information will assist DHS/USCG in meeting its statutory obligation to assign priorities while conducting maritime safety and security missions in accordance with international and U.S. regulations. As a result of a biennial review of the system, the system manager and address category has been updated to reflect the new mail stop.

Consistent with DHS’s information sharing mission, information stored in the DHS/USCG—029 Notice of Arrival and Departure (NOAD) may be shared with other DHS components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, DHS/USCG may share information with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this system of records notice.

This updated system will be included in DHS’s inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which Federal government agencies collect, maintain, use, and disseminate individuals’ records. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals when systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors.

Below is the description of the DHS/USCG—029 Notice of Arrival and Departure System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

USCG stores NOAD information electronically in the Ship Arrival Notice System (SANS) located at USCG Operations Systems Center in Kearneysville, WV. USCG uses an alternative storage facility for the SANS

historical logs and system backups. Derivative NOAD system data may be stored on USCG Standard Workstation III computers or USCG unit servers located at USCG Headquarters, headquarters units, area offices, sector offices, sector sub-unit offices, and other locations where USCG authorized personnel may be posted to facilitate DHS' mission.

RETRIEVABILITY:

USCG retrieves records from the SANS by vessel and then extracted by name, passport number, or other unique personal identifier. NOAD information maintained in the SANS is not directly retrievable by name or other unique personal identifier.

SAFEGUARDS:

USCG safeguards NOAD data in the SANS in accordance with applicable laws, rules, and policies. All records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include role-based access provisions, restricting access to authorized personnel who have a need-to-know, using locks, and password protection identification features. USCG file areas are locked after normal duty hours and the facilities are protected from the outside by security personnel. The system manager, in addition, has the capability to maintain system backups for the purpose of supporting continuity of operations and the discrete need to isolate and copy specific data access transactions for the purpose of conducting security incident investigations. All communication links with the USCG datacenter are encrypted. The databases are Certified and Accredited in accordance with the requirements of the Federal Information Security Management Act (FISMA).

RETENTION AND DISPOSAL:

In accordance with NARA Disposition Authority number N1-026-05-11, NOAD information on vessels and individuals maintained in the SANS is destroyed or deleted when no longer needed for reference, or after ten years, whichever is later. Outputs, which include ad-hoc reports generated for local and immediate use to provide a variety of interested parties, for example, Captain of the Port and marine safety offices, sea marshals, Customs and Border Patrol, Immigration and Customs Enforcement with the necessary information to set up security zones, scheduling boarding and inspections activities, actions for non-compliance with regulations, and other activities in support of USCG's mission

to provide for safety and security of U.S. ports, are deleted after five years if they do not constitute a permanent record according to NARA.

SYSTEM MANAGER AND ADDRESS:

Commandant (CG-26), United States Coast Guard, Mail Stop 7301, Washington, DC 20593-0001.
