SEMS is EPA’s comprehensive data management system that inventories and tracks information about releases addressed or needing to be addressed by the CERCLA Superfund program. SEMS consolidates legacy systems including CERCLIS into a single integrated platform. SEMS contains information for potential and confirmed

hazardous waste sites addressed under the Superfund remedial and removal programs. SEMS includes sites in the active site inventory and archived sites. The active site inventory includes sites on the NPL, and sites not on the NPL where site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. Archived sites include non-NPL sites that were formerly in the active site inventory which have no further site assessment, removal, remedial, enforcement, cost recovery or oversight needed under the Federal Superfund program based on available information. New information may warrant return of an archive site to the active inventory. Defense Federal Acquisition Regulation Supplement: Clauses With Alternates—Special Contracting Methods, Major System Acquisition, and Service Contracting (DFARS Case 2014–D004)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD is issuing a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to revise and update clauses and their prescriptions for special contracting methods, major system acquisition, and service contracting to create basic and alternate clauses

structured in a manner to facilitate use of automated contract writing systems. The rule also includes the full text of each alternate, rather than only showing the paragraphs that differ from the basic clause.

DATES: Effective November 5, 2014.

FOR FURTHER INFORMATION CONTACT: Ms. Janetta Brewer, telephone 571–372–6104.

SUPPLEMENTARY INFORMATION:

I. Background

DoD published a proposed rule in the **Federal Register** at 79 FR 30535 on May 28, 2014, to revise provisions and clauses with alternates and the associated prescriptions, in order to clarify usage and facilitate the use of automated contract writing systems. No respondents submitted comments in response to the proposed rule, and no changes were made from the proposed rule in the final rule.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

III. Regulatory Flexibility Act

A final regulatory flexibility analysis has been prepared consistent with the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, and is summarized as follows:

The purpose of this case is to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to create unique prescriptions for the basic version and each alternate of DFARS parts 217, 234, and 237 solicitations provisions and clauses, and to include the full text of each clause alternate.

The use of unique prescriptions for the basic version and each alternate of DFARS solicitations provisions and clauses will facilitate use of automated contract writing systems. The current convention requires the prescription for the basic provision or clause to address all the possibilities covered by the

alternates, and then the prescription for each alternate addresses only what is different for the use of that particular alternate. This rule revises the prescriptions so that the basic solicitation provision or clause and each alternate is unique and stands on its own. The prescriptions are not revised in any way to change when they are applicable to offerors, contractors, or subcontractors.

Additionally, the inclusion of the full text of each provision or clause alternate aims to make the terms of a provision or clause alternate clearer to offerors, as well as to DoD contracting officers. Instead of the current convention for alternates to show only paragraphs changed from the basic version of the provision or clause, this rule proposes to include the full text of each version of the clause. This will assist in making the terms of the clause clearer, because all paragraph substitutions will have already been made. Inapplicable paragraphs from the basic version of the clause that are superseded by the alternate are not included in the solicitation or contract to prevent confusion.

According to the Federal Procurement Data System, in fiscal year 2012, DoD made approximately 270,000 contract awards (not including modification and orders) that exceeded the micro-purchase threshold, of which approximately 180,000 (67%) were awarded to small businesses. It is unknown how many of these contracts were awarded that included an alternate to a DFARS provision or clause. This rule may result in potential offerors, including small businesses, expending more time to become familiar with and to understand the new format of the clause alternates in full text contained in contracts issued by any DoD contracting activity. The rule also anticipates saving contractors time by making all paragraph substitutions from the basic version of the clause, and not requiring the contractors to read inapplicable paragraphs contained in the basic version of the clause where alternates are also included in the solicitations and contracts. The overall burden caused by this rule is expected to be negligible and will not be any greater on small businesses than it is on large businesses.

No comments were received in response to the initial regulatory flexibility analysis.

This rule does not add any new reporting or recordkeeping requirements. The rule does not duplicate, overlap, or conflict with any other Federal rules. No alternatives were

identified that will accomplish the objectives of the rule.

IV. Paperwork Reduction Act

The rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

**Migratory Bird Permits; Removal of
Yellow-billed Magpie and Other
Revisions to Depredation Order**

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), change the regulations governing control of depreddating blackbirds, cowbirds, grackles, crows, and magpies. The yellow-billed magpie (*Pica nuttalli*) is endemic to California and has suffered substantial population declines. It is a species of conservation concern. We remove the species from the deprecation order. A deprecation permit will be necessary to control the species. We also narrow the application of the regulation from protection of any wildlife to protection of species recognized by the Federal Government, a State, or a Tribe as an endangered, threatened, or candidate species, or a species of special concern. We add conditions for live trapping, which are new to the regulation. Finally, we refine the reporting requirement to gather data more useful in assessing actions under the order.

DATES: This rule is effective December 5, 2014.

FOR FURTHER INFORMATION CONTACT:
George Allen, 703-358-1825.

SUPPLEMENTARY INFORMATION:**I. Background**

The U.S. Fish and Wildlife Service is the Federal agency delegated the primary responsibility for managing migratory birds. This delegation is authorized by the Migratory Bird Treaty Act (MBTA) (16 U.S.C. 703 *et seq.*), which implements conventions with Great Britain (for Canada), Mexico, Japan, and the Russian Federation (formerly the Soviet Union). We implement the provisions of the MBTA through regulations in parts 10, 13, 20, 21, and 22 of the Code of Federal Regulations (CFR). Regulations pertaining to migratory bird permits are at 50 CFR 21; subpart D of part 21 contains regulations for the control of depreddating birds.

A deprecation order allows the take of specific species of migratory birds for

specific purposes without need for a deprecation permit. The deprecation order for blackbirds, cowbirds, grackles, crows, and magpies (50 CFR 21.43) allows take when individuals of an included species are found “committing or about to commit deprecations upon ornamental or shade trees, agricultural crops, livestock, or wildlife, or when concentrated in such numbers and manner that they are a health hazard or other nuisance.”

We established the deprecation order for blackbirds and grackles in 1949 (14 FR 2446; May 11, 1949). The regulation specified that take of birds under the order was to protect agricultural crops and ornamental or shade trees. We added cowbirds to that deprecation order in 1958 (23 FR 5481; July 18, 1958). In 1972, we added magpies, crows, and horned owls to the deprecation order, and we expanded the order to cover deprecations on livestock or wildlife or “when [the birds included in the order are] concentrated in such numbers and manner as to constitute a health hazard or other nuisance” (37 FR 9223; May 6, 1972). We removed horned owls from the order in 1973 (38 FR 15448; June 12, 1973), and we removed the tri-colored blackbird (*Agelaius tricolor*) in 1989 (54 FR 47524; November 15, 1989).

From 1989 until 2010, the deprecation order at 50 CFR 21.43 pertained to “yellow-headed, red-winged, rusty, and Brewer’s blackbirds, cowbirds, all grackles, crows, and magpies.” On December 8, 2008 (73 FR 74447), we proposed “to make the list of species to which the deprecation order applies more precise by listing each species that may be controlled under the order.” We issued a final rule on December 2, 2010 (75 FR 75153), which became effective on January 3, 2011, that revised 50 CFR 21.43 to include four species of grackles; three species each of blackbirds, cowbirds, and crows; and two species of magpies, including the yellow-billed magpie.

II. Changes to the Depredation Order

On May 13, 2013, we published a proposed rule to further revise the deprecation order (78 FR 27930), in which we proposed changes to the regulation as outlined below.

Removal of the Yellow-billed Magpie

The yellow-billed magpie (*Pica nuttalli*) is an endemic species of California. It is found “primarily in the Central Valley, the southern Coast Ranges, and the foothills of the Sierra Nevada,” and is an “integral part of the oak savannah avifauna” in California (Koenig and Reynolds, 2009).
