SUPPLEMENTARY INFORMATION:

I. Abstract

As National Spatial Data Infrastructure (NSDI) stakeholders move forward with the implementation of the International Organization for Standardization’s (ISO) 191xx series of geospatial metadata standards, there is increasing demand for information about applications/editors that can be used to create ISO compliant metadata records. The USGS, through the Federal Geographic Data Committee (FGDC) Office of the Secretariat (www.fgdc.gov), proposes development of an online registration system for developers of ISO Geospatial Metadata Editors to voluntarily describe their metadata tools. Developers will be asked to include information such as features of the editor, its functionality, supported standards, and point of contact information through a login-based, online form. The FGDC Metadata Working Group (MWG) (www.fgdc.gov/participation/working-groupssubcommittees/mwg), whose membership represents Federal, State, Local and Tribal governments and the Private Sector, has requested the development of the registry as a useful tool to learn about available ISO Geospatial Metadata Editors. Since the information about the editors may be of interest or utility to others implementing ISO geospatial metadata standards, the FGDC will make the information collected available on the Web in the form of a simple registry type database. FGDC MWG members as well as non FGDC MWG members including geospatial metadata implementers from private sector, academia, all forms of government, and

the general public, will have read-only access to the editor information published in the registry.

II. Data

OMB Control Number: 1028-NEW.
Title: ISO Geospatial Metadata Editors Registry.

Type of Request: Approval of a new information collection.

Respondent Obligation: None.

Participation is voluntary.

Frequency of Collection: Annually.

Description of Respondents: Federal, State, Local and Tribal governments, Private Sector, and others involved in the development of ISO geospatial metadata.

Estimated Total Number of Annual Responses: Approximately 10.

Estimated Time per Response: We estimate that it will take 1 hour per person to document a single editor for inclusion in the Registry.

Estimated Annual Burden Hours: 10 hours in year one and less than 5 in each subsequent year.

Estimated Reporting and Recordkeeping “Non-Hour Cost” Burden: There are no “non-hour cost” burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. Until the OMB approves a collection of information, you are not obliged to respond.

Comments: On May 15, 2014, we published a **Federal Register** notice (79 FR 11199) announcing that we would submit this ICR to OMB for approval and soliciting comments. The comment period closed on July 14, 2014. We received no comments.

III. Request for Comments

Please note that comments submitted in response to this notice are a matter of public record. Before including your personal mailing address, phone

number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment, including your personally identifiable information, may be made publicly available at any time.
