BILLING CODE 6714-01-P

FEDERAL TRADE COMMISSION**Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules**

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust

Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination—on the dates

indicated—of the waiting period provided by law and the premerger notification rules. The listing for each transaction includes the transaction number and the parties to the transaction. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

EARLY TERMINATIONS GRANTED

October 1, 2014 thru October 31, 2014

10/01/2014

20141617	G	Nucor Corporation; Gerdau S.A.; Nucor Corporation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day-15-0942]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to omb@cdc.gov. Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

HIV Prevention among Latino MSM: Evaluation of a Locally Developed Intervention—Extension—(OMB #0920-0942, expiration 06/30/2015), National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Latinos are the largest and fastest growing ethnic minority group in the U.S. and have the second highest rate of HIV/AIDS diagnoses of all racial/ethnic groups in the country. From the beginning of the epidemic through 2007, Latinos accounted for 17% of all AIDS cases reported to the CDC. Among Latino males, male-to-male sexual contact is the single most important source of HIV infection, accounting for 46% of HIV infections in U.S.-born Latino men from 2001 to 2005, and for more than one-half of HIV infections among South American, Cuban, and Mexican-born Latino men in the U.S. (CDC, 2007a; 2007b). In 2006, male-to-male sex accounted for 72% of new HIV infections among Latino males. Relative to other men who have sex with men (MSM), the rate of HIV infection among Latino MSM is twice the rate recorded among whites (43.1 vs. 19.6 per 100,000).

Despite the high levels of infection risk that affect Latino MSM, no efficacious behavioral interventions to prevent infection by HIV and other sexually transmitted diseases (STDs) are available for this vulnerable population. CDC's Prevention Research Synthesis group, whose role is to identify HIV

prevention interventions that have met rigorous criteria for demonstrating evidence of efficacy, has not identified any behavioral interventions for Latino MSM that meet current efficacy criteria, and no such interventions are listed in CDC's 2011 update of its Compendium of Evidence-Based HIV Behavioral Interventions (<http://www.cdc.gov/hiv/topics/research/prs/compendium-evidence-based-interventions.htm>).

There is an urgent need for efficacious, culturally congruent HIV/STD prevention interventions for Latino MSM.

The purpose of this project is to test the efficacy of an HIV prevention intervention for reducing sexual risk among Latino men who have sex with men in North Carolina. The HOLA en Grupos intervention is a Spanish-language, small-group, 4-session intervention that is designed to increase consistent and correct condom use and HIV testing among Latino MSM and to affect other behavioral and psychosocial factors that can increase their vulnerability of HIV/STD infection. This study is using a randomized controlled trial design to assess the efficacy of the HOLA en Grupos intervention compared to a general health comparison intervention.

CDC is requesting a one-year extension for the study in order to collect information from 50 study participants and terminate information collection by the study. During the requested extension period, a 6-month follow-up assessment will be administered to a total 50 study participants. Information collection during the extension period will make it possible to measure intervention and comparison participants' socio-demographic characteristics, health seeking actions, HIV/STD and substance use-related risk behaviors, and psychosocial factors six months after they receive the HOLA en Grupos and comparison interventions, respectively, and to test the efficacy of the HOLA en Grupos intervention. Collection of the 6-month follow-up assessment information will require about one hour per study participant. The total estimated annual burden hours are 50.

There is no cost to participants other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number responses per respondent	Average burden per respondent (in hours)
Enrolled Study Participant	6-month follow-up assessment	50	1	1
