II. Background

Currently, the power reactor physical security requirements in Part 73 of Title 10 of the *Code of Federal Regulations* (10 CFR) and the NRC security orders that apply to licensees of operating nuclear power reactors also apply to decommissioning power reactor licensees, since the 10 CFR part 50 license is retained after permanent cessation of operations and removal of fuel from the reactor vessel. The NRC recognizes that licensees that have permanently ceased operations and have no fuel in the reactor vessel present a significantly reduced risk to public health and safety than operating reactors. Because of the lower comparative risk from a decommissioning power reactor, licensees typically make a case for exemptions on the basis that the application of a specific regulation in the particular circumstance of decommissioning plants is not necessary to achieve the underlying purpose of the regulations and orders.

Licensees have historically used the NRC's existing license amendment and exemption processes to propose tailored security requirements for site-specific conditions at a decommissioning facility. Licensees must follow the process outlined in 10 CFR 73.5 when applying for exemptions from security regulations.

This draft ISG would provide guidance to NRC staff in processing exemption requests and license amendments from the security requirements for nuclear power reactors that are undergoing the process of decommissioning. Use of this draft ISG would result in consistent and timely reviews of requests for exemption from

certain security regulations. Annex 1, as noted in the description of Table 1 of this draft ISG, "Physical Security Licensing Actions for Decommissioning Nuclear Power Facilities," is a standalone Safeguards document.

Annex 1 is an internal cross reference document containing site-specific security information regarding previous licensing actions for licensees undergoing decommissioning. This document will not be published or otherwise made available for comment.

The NRC staff is requesting public comment on the draft ISG. After the NRC considers any public comments, it will issue a **Federal Register** notice making a determination regarding a final ISG.

Dated at Rockville, Maryland, this 19th day of November, 2014.

For the Nuclear Regulatory Commission.

Christiana Lui,

Director, Division of Security Policy, Office of Nuclear Security and Incident Response.
