

certification of the areas for which they are providing service. Construction notifications must include electronic coverage maps, supporting technical documentation, and any other information as the Wireless Telecommunications Bureau may prescribe by public notice.

Section 27.14(s)—requires AWS–3 licensees to make a “renewal showing” at the time of license renewal— independent of the performance requirements—as a condition of renewal. The showing must include a detailed description of the applicant’s provision of service during the entire license period and address: (1) The level and quality of service provided by the applicant (*e.g.*, the population served, the area served, the number of subscribers, the services offered); (2) the date service commenced, whether service was ever interrupted, and the duration of any interruption or outage; (3) the extent to which service is provided to rural areas; (4) the extent to which service is provided to qualifying tribal land as defined in § 1.2110(f)(3)(i); and (5) any other factors associated with the level of service to the public.

Section 27.17(c)—requires that an AWS–3 licensee that permanently discontinues service must notify the Commission of the discontinuance within 10 days by filing FCC Form 601 or 605 requesting license cancellation. It also provides that an authorization will automatically terminate, without specific Commission action, if service is permanently discontinued, even if a licensee fails to file the required form requesting license cancellation. Sections 27.17(a) and (b) define permanent discontinuation of service as 180 days during which a licensee does not provide service to at least one unaffiliated subscriber.

Section 27.50(d)(3)—requires that a licensee operating an AWS–3 base or fixed station utilizing a power greater than 1640 watts EIRP or 1640 watts/MHz EIRP must be coordinated in advance with the following licensees authorized to operate within 120 kilometers (75 miles) of the base or fixed station: All Broadband Radio Service (BRS) licensees authorized in the 2155–2160 MHz band, and all AWS licensees authorized to operate on adjacent frequency blocks in the 2110–2180 MHz band.

Section 27.1131—requires AWS–3 licensees, prior to initiating operations from any base or fixed station, to coordinate their frequency usage with incumbent co-channel and adjacent-channel fixed point-to-point microwave licensees operating in the 2110–2150 MHz and 2160–2200 MHz bands. If

coordination does not resolve potential conflicts, an AWS licensee may undertake to relocate the FS stations under Part 101, Subpart B of the Commission’s rules. Although AWS–1 licensees have relocated many FS legacy operations, AWS–3 licensees will likely have to relocate some remaining incumbents, resulting in disclosures described below. Under section 101.79 of the Commission’s rules, these requirements will sunset ten years after the first AWS license is issued in the band.

Section 27.1132—requires AWS–3 licensees in the 2155–2160/62 MHz band to protect BRS stations from interference or to relocate them prior to initiating operations. Under section 27.1253 of the Commission’s rules, these requirements will sunset fifteen years after the first AWS license is issued in the band.

Section 27.1134(c)—requires AWS–3 licensees to coordinate with Federal Government incumbents before commencing operations in the 1695–1710 MHz band. For transmitters operating with a maximum EIRP of 20 dBm, coordination is required inside 27 specific Protection Zones detailed in U.S. note 88 to section 2.106 of the Commission’s rules and in the 2014 Joint PN. For higher-powered operations, § 27.1134(c) and U.S. note 88 to § 2.106 both require coordination nationwide unless otherwise specified by FCC rule, order, or notice. The 2014 Joint PN (see below) refined the nationwide default zone for higher-power operations by adding 27 Protection Zones (larger than the zones for operations up to 20 dBm, to account for the higher power).

Section 27.1134(f)—requires AWS–3 licensees to coordinate with Federal Government incumbents before commencing operations in the 1755–1780 MHz band. While the default coordination requirement for this band is nationwide, the 2014 Joint PN (see below) effectively reduced the scope of coordination to specific Protection Zones for many AWS–3 licensees that limit transmitter power to 20 dBm EIRP.
