RIN 0648-XD527

Marine Mammals; File No. 18727; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration Commerce, NOAA.

ACTION: Notice of receipt of application; Correction.

SUMMARY: On October 30, 2014, a notice was published in the **Federal Register** announcing that the University of Alaska Museum of the North, 907 Yukon Drive, Fairbanks, AK 99775-6960 (Aren Gunderson, Responsible Party), had applied in due form for a permit to collect, import and export specimens of marine mammals for scientific research. That document inadvertently provided incorrect requested take numbers. This document corrects that oversight.

DATES: Written, telefaxed, or email comments may be received on or before January 7, 2015.

FOR FURTHER INFORMATION CONTACT: Brendan Hurley or Jennifer Skidmore, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The notice for File No. 18727 (79 FR 64571; October 30, 2014) contained incorrect take numbers associated with the collection, receipt, import, and export of samples under the proposed action. Accordingly, the **SUPPLEMENTARY INFORMATION** section is corrected to read as follows:

The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361, *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531, *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151, *et seq.*).

File No. 18727: The University of Alaska Museum of the North functions

as an archive for scientific specimens of marine mammals under the jurisdiction of the National Marine Fisheries and is a major repository of marine mammal material from the Arctic and North Pacific oceans. Under the proposed permit, the applicant would (1) import/export marine mammal parts (bones and organ tissue samples) from dead beach-cast carcasses, (2) receive/archive and export samples of marine mammals taken by Alaskan Native subsistence hunters, and (3) receive, import/export specimens from scientists in academic, federal, and state institutions involved in marine mammal research under their own permits. Unlimited samples from up to 2000 pinnipeds (excluding walrus) and 600 cetaceans would be collected, received, imported, or exported annually. Import/export activities would occur world-wide. No live animals would be harassed or taken, lethally or otherwise, under the requested permit. The permit is requested for a five-year period.

All other information contained in the document is unchanged.

Dated: December 2, 2014.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XA341

Marine Mammals; File No. 15324

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of permit amendment.

SUMMARY: Notice is hereby given that a major amendment to Permit No. 15324 has been issued to the Alaska Department of Fish and Game (ADF&G), Division of Wildlife Conservation, Juneau, AK (Responsible Party: Robert Small, Ph.D.).

ADDRESSES: The permit amendment and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Amy Sloan or Courtney Smith, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On April 4, 2014, notice was published in the **Federal Register** (79 FR 18890) that a request for an amendment Permit No. 15324 to conduct research on pinniped species in Alaska had been submitted by the above-named applicant. The requested permit amendment has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 15324-01 authorizes the permit holder to take spotted (*Phoca largha*), ringed (*Phoca hispida*), bearded (*Erignathus barbatus*), and ribbon seals (*Histiophoca fasciata*) in the Bering, Chukchi, and Beaufort seas of Alaska to monitor the status and health of each species by analyzing biological samples from the subsistence harvest and live captured seals, and by documenting movements and habitat use by tracking animals with satellite transmitters. The permit authorizes harassment of non-target seals of each species and a limited number of research-related mortalities. Samples may be imported from Russia, Canada, Svalbard (Norway) and exported to Canada for analyses. The permit was amended to include: (1) Takes by harassment during aerial and vessel surveys to monitor seal distribution relative to changes in sea ice; (2) increased takes by incidental harassment; (3) the use of additional sedative drugs during capture activities; and (4) the use of remote dart-delivery as a method for capturing bearded seals. The amended permit is valid through December 31, 2016.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
