

simultaneously. In such a case, the Department will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. This modification also requires that an extension request must be made in a separate, stand-alone submission, and clarifies the circumstances under which the Department will grant untimely-filed requests for the extension of time limits. These modifications are effective for all segments initiated on or after October 21, 2013, and thus are applicable to these investigations. Interested parties should review *Extension of Time Limits; Final Rule*, available at <http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm>, prior to submitting factual information in these investigations.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.⁷² Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.⁷³ The Department intends to reject factual submissions if the submitting party does not comply with the applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures*, 73 FR 3634 (January 22, 2008). Parties wishing to participate in these investigations should ensure that they meet the requirements of these procedures (e.g., the filing of letters of appearance as discussed in 19 CFR 351.103(d)).

This notice is issued and published pursuant to section 777(i) of the Act and 19 CFR 351.203(c).

Dated: December 2, 2014.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigations

The merchandise subject to these investigations is melamine (Chemical Abstracts Service (“CAS”) registry number 108–78–01, molecular formula $C_3H_6N_6$).¹ Melamine is a crystalline powder or granule typically (but not exclusively) used to manufacture melamine formaldehyde resins. All melamine is covered by the scope of these investigations irrespective of purity, particle size, or physical form. Melamine that has been blended with other products is included within this scope when such blends include constituent parts that have been intermingled, but that have not been chemically reacted with each other to produce a different product. For such blends, only the melamine component of the mixture is covered by the scope of these investigations. Melamine that is otherwise subject to these investigations is not excluded when commingled with melamine from sources not subject to these investigations. Only the subject component of such commingled products is covered by the scope of these investigations.

The subject merchandise is provided for in subheading 2933.61.0000 of the Harmonized Tariff Schedule of the United States (“HTSUS”). Although the HTSUS subheading and CAS registry number are provided for convenience and customs purposes, the written description of the scope is dispositive.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

The North Atlantic right whale (*Eubalaena glacialis*) is an endangered marine mammal found primarily in waters off the northeastern coast of the United States to Canada. Fatal collisions with large ships are the primary threat to the recovery of this species. In 1998 the United States proposed to the International Maritime Organization (IMO) the establishment of two Mandatory Ship Reporting (MSR) systems in key right whale habitat areas. Under the proposed MSR all vessels 300 gross tons or greater are required to send a message to a shore-based station when entering either of two prescribed habitat areas. The IMO endorsed the proposal and the MSR systems were established in July 1999. Each reporting ship is required to provide vessel name, call sign, course, speed, location, destination, and route (e.g., waypoints). An automatically-generated message is sent directly to the reporting vessel that includes information on right whale locations and procedural guidance to help prevent vessel/whale collisions; mariners are also informed about additional regulations established to protect whales from vessel strikes. The two-way exchange is mediated by satellite-linked communications systems.

Although the program has been in effect for over 15 years, the U.S. Government has not assessed the role, if any, that the MSR has in reducing ship collisions with right whales. In addition, mariners have not been polled to assess possible difficulties involved in the reporting itself. The goal of this information collection is to determine if (a) the reporting procedures are adequately clear to the mariner; (b) the reporting itself is onerous or unwieldy

(e.g., it may interfere with other vessel operations); and (c) mariners use the information being sent to them and if so, how it is used to avoid collisions with North Atlantic right whales.

II. Method of Collection

This will be a web-based survey.

III. Data

OMB Control Number: 0648–xxxx.

Form Number(s): None.

Type of Review: Regular submission (request for a new information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 2,000.

Estimated Time per Response: 5 minutes.

Estimated Total Annual Burden Hours: 167.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

National Marine Sanctuary regulations at 15 CFR part 922 list specific activities that are prohibited in national marine sanctuaries. These regulations also state that otherwise prohibited activities are permissible if a permit is issued by the Office of National Marine Sanctuaries (ONMS). Persons desiring a permit must submit an application, and anyone obtaining a permit is generally required to submit one or more reports on the activity allowed under the permit.

The recordkeeping and reporting requirements at 15 CFR part 922 form the basis for this collection of information. This information is required by ONMS to protect and manage sanctuary resources as required by the National Marine Sanctuaries Act (16 U.S.C. 1431 *et seq.*).

II. Method of Collection

Depending on the permit being requested, various applications, reports,

and telephone calls may be required from applicants. Applications and reports can be submitted via email, fax, or traditional mail. Applicants are encouraged to use electronic means to apply for permits and submit reports whenever possible.

III. Data
