

parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, "Aquatic Environmental Studies for Nuclear Power Stations," is a proposed new regulatory guide, and it is temporarily identified by its task number, DG-4023. The DG provides technical guidance for aquatic environmental studies and analyses supporting decisions related to nuclear power stations by NRC. For purposes of DG-4023, the term "aquatic" encompasses freshwater, estuarine, and marine environments. The DG addresses wetlands containing submerged aquatic vegetation but does not address wetlands also containing emergent vegetation. Instead, NRC's Regulatory Guide 4.11, "Terrestrial Environmental Studies for Nuclear Power Stations," addresses such wetland features, along with the terrestrial environment. Although the NRC is issuing separate regulatory guides addressing terrestrial and aquatic environmental studies, it recognizes that aquatic and terrestrial ecological issues often overlap and are often interrelated.

III. Backfitting and Issue Finality

Issuance of this DG, if finalized, would not constitute backfitting as defined in § 50.109 of Title 10 of the Code of Federal Regulations (10 CFR) (the Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of this DG, the NRC has no current intention to impose this DG, if finalized, on holders of current operating licenses or combined licenses.

This DG, if finalized, may be applied to applications for construction permits, operating licenses, early site permits, combines licenses and limited work authorizations docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications for construction permits, operating licenses, early site permits, combines licenses and limited work authorizations submitted after the issuance of the final regulatory guide. Such action would not constitute backfitting as defined in 10 CFR 50.109(a)(1) and would not be inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Dated at Rockville, Maryland, this 5th day of December, 2014.

For the Nuclear Regulatory Commission.

Harriet Karagiannis,
Acting Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-7005; NRC-2009-0283; EA-14-104]

Supersede Exemption for Waste Control Specialists, LLC; Andrews County, Texas

AGENCY: Nuclear Regulatory Commission.

ACTION: Order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a new Order superseding a previously issued Order to Waste Control Specialists, LLC., (WCS) on October 20, 2009 (2009 Order). The previous Order exempted WCS from the NRC's regulations concerning special nuclear material (SNM). The current action is in response to a request by WCS dated July 18, 2014.
