

“Requirements for Renewal of Operating Licenses for Nuclear Power Plants.”

3. *Current OMB approval number:* 3150–0155.

4. *The form number if applicable:* N/A.

5. *How often the collection is required:* There is a one-time application for any licensee wishing to renew the operating license for its nuclear power plant. There is a one-time requirement for each licensee with a renewed operating license to submit a letter documenting the completion of inspection and testing activities. All holders of renewed licenses must perform yearly record keeping.

6. *Who will be required or asked to report:* Commercial nuclear power plant licensees who wish to renew their operating licenses and holders of renewed licenses.

7. *An estimate of the number of annual responses:* 6.

8. *The estimated number of annual respondents:* 58 (52 recordkeepers + 6 responses (2 license renewal applications expected on average + 4 letters documenting the completion of inspection and testing activities expected on average)).

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 220,340 hours (168,340 hours of reporting + 52,000 hours of recordkeeping).

10. *Abstract:* Part 54 of Title 10 of the Code of Federal Regulations (10 CFR), establishes license renewal requirements for commercial nuclear power plants and describes the information that licensees must submit to the NRC when applying for a license renewal. The application must contain information on how the licensee will manage the detrimental effects of age-related degradation on certain plant systems, structures, and components so as to continue the plant's safe operation during the renewal term. The NRC needs this information to determine whether the licensee's actions will be effective in assuring the plants' continued safe operation during the period of extended operation.

Holders of renewed licenses must retain in an auditable and retrievable form, for the term of the renewed operating license, all information and documentation required to document compliance with 10 CFR part 54. The NRC needs access to this information for continuing effective regulatory oversight.
