Notice of Request for Nominees for the U.S. Extractive Industries Transparency Initiative Advisory Committee

AGENCY: Office of Natural Resources
Revenue Management, Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior is seeking nominations for individuals to be Committee members or alternates on the U.S. Extractive Industries Transparency Initiative Advisory Committee. We seek nominees who can represent stakeholder constituencies from government, civil society, and industry so that we can fill current vacancies and create a roster of candidates in case future vacancies occur.

DATES: Submit nominations by March 31, 2015.

ADDRESSES: You may submit nominations by any of the following methods.

- Mail or hand-carry nominations to Ms. Rosita Compton Christian; Department of the Interior; 1849 C Street NW., MS 4211, Washington, DC 20240.
- Email nominations to USEITI@ios.doi.gov.

FOR FURTHER INFORMATION CONTACT:

Rosita Compton Christian at (202) 208-0272 or (202) 513-0597; fax (202) 513-0682; email Rosita.ComptonChristian@onrr.gov or useiti@ios.doi.gov; or via mail at the Department of the Interior; 1849 C Street NW., MS 4211; Washington, DC 20240.

SUPPLEMENTARY INFORMATION: Interior established the Committee on July 26, 2012, in accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. App. 2), and with the concurrence of the General Services Administration. The Committee serves as the U.S. Extractive Industries Transparency Initiative Multi-Stakeholder Group and advises the Secretary of the Interior on design and implementation of the initiative.

The Committee does the following:

- Oversees the U.S. implementation of the Extractive Industries Transparency Initiative (EITI), a global

standard for governments to publicly disclose revenues received from oil, gas, and mining assets belonging to the government, with parallel public disclosure by companies of payments to the government (e.g. royalties, rents, bonuses, taxes, or other payments).

- Develops and recommends to the Secretary a fully-costed work plan, containing measurable targets and a timetable for implementation and incorporating an assessment of capacity constraints. This plan will be developed in consultation with key EITI stakeholders and published upon completion.

- Provides opportunities for collaboration and consultation among stakeholders.

- Advises the Secretary and posts for consideration by other stakeholders proposals for conducting long-term oversight and other activities necessary to achieve and maintain EITI-compliant status.

The Committee consists of representatives from three stakeholder sectors. The sectors are as follows:

- Industry, including non-Federal representatives from the extractive industry, including oil, gas, and mining companies and industry-related trade associations.

- Civil society, including organizations with an interest in extractive industries, transparency, and government oversight; members of the public; and public and/or private investors.

- Government, including Federal, State, local, and Tribal governments and individual Indian mineral owners.

In addition to honoring the EITI principle of self-selection within the stakeholder sector, the following criteria will be considered in making final selections:

- Understanding of and commitment to the EITI process;
- Ability to collaborate and operate in a multi-stakeholder setting;
- Access to and support from a relevant stakeholder constituency; and
- Basic understanding of the extractive industry and/or revenue collection; or willingness to be educated on such matters.

Nominations should include a resume providing relevant contact information and an adequate description of the nominee's qualifications, including information that would enable the Department of the Interior to make an informed decision regarding meeting the membership requirements of the Committee and to permit the Department of the Interior to contact a potential member.

Parties are strongly encouraged to work with and within stakeholder sectors (including industry, civil society, and government sectors, as the EITI process defines) to jointly consider and submit nominations that, overall, reflect the diversity and breadth of their sector. Nominees are strongly encouraged to include supporting letters from constituents, trade associations, alliances, and/or other organizations that indicate the support by a meaningful constituency for the nominee.

Individuals who are Federally registered lobbyists are ineligible to serve on all FACA and non-FACA boards, committees, or councils in an individual capacity. The term "individual capacity" refers to individuals who are appointed to exercise their own individual best judgment on behalf of the government, such as when they are designated Special Government Employees, rather than being appointed to represent a particular interest.

The Committee will meet quarterly or at the request of the Designated Federal Officer. Non-Federal members of the Committee will serve without compensation. However, we may pay the Travel and per diem expenses of Committee members, if appropriate, under the Federal Travel Regulations.

To learn more about USEITI please visit the official Web site at www.doi.gov/eiti.

Dated: December 17, 2014.

Paul A. Mussenden,

Deputy Assistant Secretary—Natural Resources Revenue Management.

Public Review of the Draft Part 2 (Revision), Digital Orthoimagery, of the Federal Geographic Data Committee (FGDC) Geographic Information Framework Data Standard

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice; request for comment

SUMMARY: The Federal Geographic Data Committee (FGDC) is conducting a public review of the draft Part 2 (revision), Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard.

The primary purpose of Part 2, Digital Orthoimagery, of the FGDC Geographic

Information Framework Data Content Standard is to support exchange of orthoimagery data. Part 2 seeks to establish a common baseline for the semantic content of orthoimagery databases for public agencies and private enterprises. It also seeks to decrease the costs and simplify the exchange of orthoimagery data among local, Tribal, State, and Federal users and producers. That, in turn, discourages duplicative data collection. Benefits of adopting Part 2 also include the long-term improvement of geospatial orthoimagery data within the community.

The draft Part 2 (revision), Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard, may be downloaded from <https://www.fgdc.gov/standards/projects/FGDC-standards-projects/framework-data-standard/DraftRevisionPart2>. Comments shall be submitted using the content template at <http://www.fgdc.gov/standards/process/standards-directives/template.doc>. Instructions for completing the comment template are found in FGDC Standards Directive #2d, Standards Working Group Review Guidelines: Review Comment Template, <http://www.fgdc.gov/standards/process/standards-directives/directive-2d-standards-working-group-review-guidelines-review-comment-template>.

Comments that concern specific issues/changes/additions may result in changes in the draft Part 2 (revision), Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard. Reviewers may obtain information about how comments were addressed upon request. After FGDC endorsement of Part 2 (revision), Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard and a summary analysis of the changes will be made available to the public on the FGDC Web site, www.fgdc.gov.

DATES: Comments on the draft Part 2 (revision), Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard, shall be submitted to Ms. Julie Binder Maitra, FGDC Standards Coordinator, jmaitra@fgdc.gov by March 24, 2015.

FOR FURTHER INFORMATION CONTACT: Ms. Julie Binder Maitra, U.S. Geological Survey, Federal Geographic Data Committee, jmaitra@fgdc.gov, 703-648-4627

SUPPLEMENTARY INFORMATION: Part 2, Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard specifies data content and logical structure for the description and interchange of framework digital orthoimagery. To a certain extent, it also

provides guidelines for the acquisition and processing of imagery for generation of digital orthoimagery and specifies the documentation of those acquisition and processing steps. The primary focus of Part 2 is on images sensed in the visible to near infrared portion of the electromagnetic spectrum; however, images captured from other portions of the electromagnetic spectrum are not precluded.

It is the intent of Part 2, Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard to set a common baseline that will ensure the widest utility of digital orthoimagery for the user and producer communities through enhanced data sharing and the reduction of redundant data production. Part 2 stresses complete and accurate reporting of information relating to quality control and standards employed in testing orthoimagery data.

Part 2, Digital Orthoimagery, of the FGDC Geographic Information Framework Data Standard applies to orthoimagery data produced or disseminated by or for the Federal government. According to Office of Management and the Budget (OMB) Circular A-16 (Revised) on Coordination of Geographic Information Related Spatial Data Activities, Federal agencies collecting or producing geospatial data, either directly or indirectly (for example, through grants, partnerships, or contracts with other entities), shall ensure, prior to obligating funds for such activities, that data will be collected in a manner that meets all relevant standards adopted through the Federal Geographic Data Committee (FGDC) process.

Work on the FGDC Geographic Information Framework Data Standard began under the Geospatial One-Stop e-Government initiative. The FGDC subsequently endorsed the Geographic Information Framework Data Standard, Parts 1-7, in 1998. Part 2 needed to be revised due to technological changes, such as the transition from film to digital cameras. The main changes included adding new terms, clarification of definitions, and typo fixes.

The FGDC coordinates the development of the National Spatial Data Infrastructure (NSDI), which encompasses the policies, standards, and procedures for organizations to cooperatively produce and share geospatial data. Federal agencies that make up the FGDC develop the NSDI in cooperation with organizations from State, local and tribal governments, the academic community, and the private sector. The authority for the FGDC is
