

Dated: December 19, 2014.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix—Scope of Investigation

The scope of this investigation is passenger vehicle and light truck tires. Passenger vehicle and light truck tires are new pneumatic tires, of rubber, with a passenger vehicle or light truck size designation. Tires covered by this investigation may be tube-type, tubeless, radial, or non-radial, and they may be intended for sale to original equipment manufacturers or the replacement market.

Subject tires have, at the time of importation, the symbol “DOT” on the sidewall, certifying that the tire conforms to applicable motor vehicle safety standards. Subject tires may also have the following prefixes or suffix in their tire size designation, which also appears on the sidewall of the tire:

Prefix designations:

P—Identifies a tire intended primarily for service on passenger cars

LT—Identifies a tire intended primarily for service on light trucks

Suffix letter designations:

LT—Identifies light truck tires for service on trucks, buses, trailers, and multipurpose passenger vehicles used in nominal highway service

All tires with a “P” or “LT” prefix, and all tires with an “LT” suffix in their sidewall markings are covered by this investigation regardless of their intended use.

In addition, all tires that lack a “P” or “LT” prefix or suffix in their sidewall markings, as well as all tires that include any other prefix or suffix in their sidewall markings, are included in the scope, regardless of their intended use, as long as the tire is of a size that is among the numerical size designations listed in the passenger car section or light truck section of the *Tire and Rim Association Year Book*, as updated annually, unless the tire falls within one of the specific exclusions set out below.

Passenger vehicle and light truck tires, whether or not attached to wheels or rims, are included in the scope. However, if a subject tire is imported attached to a wheel or rim, only the tire is covered by the scope.

Specifically excluded from the scope of this investigation are the following types of tires:

(1) racing car tires; such tires do not bear the symbol “DOT” on the sidewall and may be marked with “ZR” in size designation;

(2) new pneumatic tires, of rubber, of a size that is not listed in the passenger car section or light truck section of the *Tire and Rim Association Year Book*;

(3) pneumatic tires, of rubber, that are not new, including recycled and retreaded tires;

(4) non-pneumatic tires, such as solid rubber tires;

(5) tires designed and marketed exclusively as temporary use spare tires for passenger vehicles which, in addition, exhibit each of the following physical characteristics:

(a) the size designation and load index combination molded on the tire’s sidewall

are listed in Table PCT–1B (“T” Type Spare Tires for Temporary Use on Passenger Vehicles) of the *Tire and Rim Association Year Book*,

(b) the designation “T” is molded into the tire’s sidewall as part of the size designation, and,

(c) the tire’s speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by *Tire and Rim Association Year Book*, and the rated speed is 81 MPH or a “M” rating;

(6) tires designed and marketed exclusively for specialty tire (ST) use which, in addition, exhibit each of the following physical characteristics: *

(a) the size designation molded on the tire’s sidewall is listed in the ST sections of the *Tire and Rim Association Year Book*,

(b) the designation “ST” is molded into the tire’s sidewall as part of the size designation,

(c) the tire incorporates a warning, prominently molded on the sidewall, that the tire is “For Trailer Service Only” or “For Trailer Use Only”,

(d) the load index molded on the tire’s sidewall meets or exceeds those load indexes listed in the *Tire and Rim Association Year Book* for the relevant ST tire size, and

(e) the tire’s speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by TRA, and the rated speed does not exceed 81 MPH or an “M” rating;

(7) tires designed and marketed exclusively for off-road use and which, in addition, exhibit each of the following physical characteristics:

(a) the size designation and load index combination molded on the tire’s sidewall are listed in the off-the-road, agricultural, industrial or ATV section of the *Tire and Rim Association Year Book*,

(b) in addition to any size designation markings, the tire incorporates a warning, prominently molded on the sidewall, that the tire is “Not For Highway Service” or “Not for Highway Use”,

(c) the tire’s speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by the *Tire and Rim Association Year Book*, and the rated speed does not exceed 55 MPH or a “G” rating, and

(d) the tire features a recognizable off-road tread design.

The products covered by the investigation are currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4011.10.10.10, 4011.10.10.20, 4011.10.10.30, 4011.10.10.40, 4011.10.10.50, 4011.10.10.60, 4011.10.10.70, 4011.10.50.00, 4011.20.10.05, and 4011.20.50.10. Tires meeting the scope description may also enter under the following HTSUS subheadings: 4011.99.45.10, 4011.99.45.50, 4011.99.85.10, 4011.99.85.50, 8708.70.45.45, 8708.70.45.60, 8708.70.60.30, 8708.70.60.45, and 8708.70.60.60. While HTSUS subheadings are provided for convenience and for

* We are currently suspending requirements (6)(d) and (e); therefore, tires entered, or withdrawn from warehouse for consumption that meet exclusion requirements (6)(a)–(c) above are excluded from the scope of this investigation.

customs purposes, the written description of the subject merchandise is dispositive.

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Trawl Rationalization Program; 2015 Cost Recovery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; 2015 cost recovery fee percentages and mothership (MS) pricing.

SUMMARY: This action provides participants in the Pacific coast groundfish trawl rationalization program with the 2015 fee percentages and MS pricing needed to calculate the required payments for cost recovery fees due in 2015.

For calendar year 2015, NMFS announces the following fee percentages by sector: 3.0 percent for the Shorebased Individual Fishing Quota (IFQ) Program, 1.2 percent for the MS Coop Program, 0.0 percent for the Catcher Processor (C/P) Coop Program.

For 2015, the MS pricing to be used as a proxy by the C/P Coop Program is: \$0.13/lb for Pacific whiting.

DATES: Effective January 1, 2015.

FOR FURTHER INFORMATION CONTACT:

Christopher Biegel, Cost Recovery Program Coordinator, (503) 231–6291, fax (503) 872–2737, email Christopher.Biegel@NOAA.gov.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Act (MSA) requires NMFS to collect fees to recover the costs directly related to the management, data collection, and enforcement of a limited access privilege program (LAPP) (16 U.S.C. 1854(d)(2)), also called “cost recovery.” The Pacific coast groundfish trawl rationalization program is a LAPP, implemented in 2011, and consists of three sectors: the Shorebased IFQ Program, the MS Coop Program, and the C/P Coop Program. In accordance with the MSA, and based on a recommended structure and methodology developed in coordination with the Pacific Fishery Management Council, NMFS collects

mandatory fees of up to three percent of the ex-vessel value of groundfish by sector (Shorebased IFQ Program, MS Coop Program, and C/P Coop Program). NMFS collects the fees to recover the incremental costs of management, data collection, and enforcement of the trawl rationalization program. Beginning in January 2014, NMFS implemented cost recovery for the trawl rationalization program. Additional background can be found in the cost recovery proposed and final rules, 78 FR 7371 (February 1, 2013) and 78 FR 75268 (December 11, 2013), respectively. The details of cost recovery for the groundfish trawl rationalization program are in regulation at 50 CFR 660.115 (trawl fishery cost recovery program), § 660.140 (Shorebased IFQ Program), § 660.150 (MS Coop Program), and § 660.160 (C/P Coop Program).

The cost recovery program regulations require NMFS to announce, in a **Federal Register** document, the next year's applicable fee percentages and the applicable MS pricing for the C/P Coop Program. NMFS calculates and announces the fee percentage after each fiscal year ends, and before the fee would go into effect on January 1 of the following year. NMFS calculated the fee percentages by sector using the best available information. For 2015, the fee percentages by sector, which must not exceed three percent of the ex-vessel value of fish harvested, are:

- 3.0 percent for the Shorebased IFQ Program,
- 1.2 percent for the MS Coop Program,
- 0.0 percent for the C/P Coop Program.

To calculate the fee percentages, NMFS used the formula specified in regulation at § 660.115(b)(1), where the fee percentage by sector equals the lower of three percent or direct program costs (DPC) for that sector divided by total ex-vessel value (V) for that sector multiplied by 100.

“DPC”, as defined in the regulations at § 660.115(b)(1)(i), are the actual incremental costs for the previous fiscal year directly related to the management, data collection, and enforcement of each sector (Shorebased IFQ Program, MS Coop Program, and C/P Coop Program). Actual incremental costs means those net costs that would not have been incurred but for the implementation of the trawl rationalization program, including both increased costs for new requirements of the program and reduced costs resulting from any program efficiencies. Similar to 2014, NMFS only included the cost of employees' time (salary and benefits) spent working on the program in calculating DPC rather than all incremental costs of management, data collection, and enforcement.

“V”, as specified at § 660.115(b)(1)(ii), is the total ex-vessel value for each sector from the previous calendar year. The ex-vessel value for each sector is further described in the definition section at § 660.111, and includes the total ex-vessel value for all groundfish species. For 2015, NMFS used the ex-vessel value for 2013 as reported in Pacific Fisheries Information Network (PacFIN) from electronic fish tickets to determine V. The electronic fish ticket data in PacFIN is for the Shorebased IFQ Program. Therefore, the ex-vessel value

for both the MS Coop Program and the C/P Coop Program is a proxy based on the Shorebased IFQ Program ex-vessel price and on the retained catch estimates (weight) from the observer data for the MS and C/P Coop Programs.

Due to fluctuations in actual ex-vessel values and amounts landed, the amount NMFS collects each year in cost recovery fees can be over or under NMFS' costs from the previous fiscal year. Accordingly, the cost recovery regulations at § 660.115(b)(1)(i) state that if the amount of fees collected by NMFS is greater or less than the actual net incremental costs incurred, the DPC will be adjusted accordingly for the calculation of the fee percentage in the following year. For the IFQ and MS sectors, NMFS estimates the total fees that will be collected based on the collections up to the date of determination, as landings data have not been finalized when an adjustment is determined. However, NMFS has final data on the pounds of Pacific whiting harvested by the C/P Coop Program for 2014 and the price per pound that the C/P Coop Program participants used to calculate their 2014 fee (*i.e.*, \$ 0.14 per pound as the “MS pricing” for 2014 reported in 78 FR 75268, 12/11/2013). With these data, NMFS can determine the fees that should be collected from C/P Coop Program participants. An adjustment ensures that the aggregate fees being collected are appropriate. In 2014 it is estimated that both the MS Coop and C/P Coop fisheries will have remitted fee amounts greater than the FY 2013 DPC used to calculate the 2014 fee percentages. As such the 2015 DPC will be adjusted as follows:

	FY 2013 DPC used for 2014 calculation	2014 Fees collected	Adjustment for 2015
Shorebased IFQ Program	\$1,877,752.00	\$1,356,285.28	N/A
MS Coop Program	274,936.05	331,004.07	(\$56,068.02)
C/P Coop Program	176,460.05	350,387.25	(\$173,927.20)

The DPC used to calculate the 2015 fee percentage for the Shorebased IFQ Program was already above the 3 percent cap before the adjustment and therefore the adjustment for 2015 would have no effect on the 2015 fee percentage and is not included. The adjustments for the MS Coop Program and C/P Coop program are included, and reduce the DPC values shown below in the fee percentage calculations for those two sectors.

The adjustment in the C/P Coop program costs shows that NMFS anticipates collecting \$15,295.71 more than the adjusted costs in 2014 resulting

in a fee percentage of -0.1. Because a fee percentage cannot be negative, NMFS is setting the 2015 C/P Coop program cost recovery fee at 0.0 percent and will deduct \$15,295.71 from the 2015 DPC to adjust the 2016 fee percentage. The calculations, using the adjusted DPCs as described above, are as follows:

Shorebased IFQ Program—3.0% = the lower of 3% or $(\$2,028,859.04 / \$51,557,998) \times 100$

MS Coop Program—1.2% = the lower of 3% or $(\$233,300.78 / \$14,759,147) \times 100$

C/P Coop Program— -0.1% = the lower of 3% or $(\$ -15,295.71 / \$22,233,966) \times 100$.

MS pricing is the MS Coop Program's average price per pound from the previous complete calendar year. The MS pricing will be used by the C/P Coop Program to determine their fee amount due (MS pricing multiplied by the value of the aggregate pounds of all groundfish species harvested by the vessel registered to a C/P-endorsed limited entry trawl permit, multiplied by the C/P fee percentage, equals the fee amount due). Similar to 2014, MS pricing for cost recovery is based on the

average price per pound of Pacific whiting as reported in PacFIN from the Shorebased IFQ Program. For 2015 MS pricing, NMFS used data from calendar year 2013. In other words, data from the IFQ fishery is used as a proxy for the MS average price per pound to determine the "MS pricing" used in the calculation for the C/P sector's fee amount due. In future years, NMFS may use values derived from those reported on the MS Coop Program cost recovery form from the previous calendar year, depending on what NMFS determines is the best information available. NMFS has calculated the 2015 MS pricing to be used as a proxy by the C/P Coop Program as: \$0.13/lb for Pacific whiting.

Cost recovery fees are submitted to NMFS by Fish buyers via Pay.gov (<https://www.pay.gov/paygov/>). Fish buyers registered with Pay.gov can login in the upper left-hand corner of the screen. Fish buyers not registered with Pay.gov can go to the cost recovery forms directly from the Web site below. Click on the link to Pacific Coast Groundfish Cost Recovery for your sector (IFQ, MS, or C/P): <https://pay.gov/public/search/global?searchString=&groundfish+cost+recovery&formToken=6c80d7e6-a44c-4e9f-a4cc-be7aa5000820>.

As stated in the preamble to the cost recovery proposed and final rules, in the spring of each year, NMFS will release an annual report documenting the details and data used for the above calculations. The report will include information such as the fee percentage calculation, program costs, and ex-vessel value by sector. The annual report for fishing year 2013 and calculation for 2014 is available at: http://www.westcoast.fisheries.noaa.gov/publications/fishery_management/rawl_program/analytical%20docs/cost_recovery_annual_report_01.pdf.

The annual report for fishing year 2014 and calculation for 2015 will be made available to the public electronically via the NMFS West Coast Region Groundfish Web site: http://www.westcoast.fisheries.noaa.gov/fisheries/groundfish_catch_shares/index.html.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XD686

North Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The North Pacific Fishery Management Council (NPFMC) will hold a Crab Modeling Workshop and a Crab Plan Team meeting. The workshop will be held January 13–15, 2015 with a Crab Plan Team meeting January 16, 2015.

DATES: The workshop will be held January 13–15, 2015, from 9 a.m. to 5 p.m. each day; The Crab Plan Team meeting will be held January 16, 2015, from 9 a.m. to 12 p.m.

ADDRESSES: Both meetings will be held at the Alaska Fishery Science Center AFSC, 7600 Sand Point Way NE., Bldg 4, Traynor Room, Seattle, WA.

Council address: North Pacific Fishery Management Council, 605 W. 4th Avenue, Suite 306, Anchorage, AK 99501-2252.

FOR FURTHER INFORMATION CONTACT: Diana Stram; telephone: (907)271-2809.

SUPPLEMENTARY INFORMATION: The agenda includes:

Modeling Workshop: Work session on the development of the generic crab modeling framework (Gmacs). Goals are to communicate with and receive feedback from stock assessment authors on the development and application of the modeling framework for BSAI crab stocks. The Crab Plan Team meeting will review the stock assessment for Norton Sound Red King Crab and recommend the Overfishing Levels (OFL) and Acceptable Biological Catch (ABC) for 2015/16.

The Agenda is subject to change, and the latest version will be posted at <http://www.npfmc.org>.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Gail Bendixen at (907) 271-2809 at least 7 working days prior to the meeting date.

Dated: December 22, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
