

security issues, which are matters separate from the technical requirements to operate a facility covered by backfitting and issue finality provisions. The security guidance in this regulatory guide would be the same for all entities to whom this draft regulatory guide applies; it does not distinguish between nuclear power plant licensees and certain fuel cycle facilities under part 70 (who are protected by backfitting and issue resolution provisions), and the other entities to whom this regulatory guide applies. Thus, the security-related guidance in the draft regulatory guide should not be viewed as falling within the scope of matters within the purview of backfitting and issue finality.

The DG, if finalized, could be applied to applications for 10 CFR part 50 operating licenses; 10 CFR part 52, subpart B, C, E, or F approvals; or licenses issued under part 70. Such action would not constitute backfitting as defined in 10 CFR 50.109 or 10 CFR 70.76 or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants are not within the scope of entities protected by 10 CFR 50.109, 10 CFR 70.76, or the relevant issue finality provisions in 10 CFR part 52. Backfitting restrictions were not intended to apply to every NRC action that substantially changes settled expectations, and applicants have no reasonable expectation that future requirements may change, *see* 54 FR 15372 (April 18, 1989), at 15385–86. Although the issue finality provisions in part 52 are intended to provide regulatory stability and issue finality, the matters addressed in this regulatory guide (concerning certain security requirements in part 73) are not within the scope of issues that may be resolved for design certification, design approval or a manufacturing license, and therefore are not subject to issue finality protections in part 52.

II. Discussion

The NRC is issuing for public comment a draft plant-specific Supplement 54 to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, regarding the renewal of operating license NPF-37 AND NPF-66 for an additional 20 years of operation for Byron. Supplement 54 to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. The NRC's preliminary recommendation is that the adverse environmental impacts of license renewal for Byron are not great enough to deny the option of license renewal for energy-planning decisionmakers.

III. Public Meetings

The NRC staff will hold public meetings prior to the close of the public comment period to present an overview of the draft plant-specific supplement to the GEIS and to accept public comment on the document. Two meetings will be held at the Byron Forrest Preserve, 7993 North River Road, Byron, Illinois 61010, on Tuesday, February 3, 2015. The first session will convene at 2 p.m. and will continue until 4 p.m., as necessary. The second session will convene at 7 p.m. and will continue until 9 p.m., as necessary. The meetings will be transcribed and will include: (1) A presentation of the contents of the draft plant-specific supplement to the GEIS; and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. Additionally, the NRC staff will host informal discussions one hour prior to the start of each session at the same location. No comments on the draft supplement to the GEIS will be accepted during the informal discussions. To be considered in the final supplement to the GEIS, comments must be provided either at the transcribed public meeting or submitted in writing by the comment deadline identified above. Persons may pre-register to attend or present oral comments at the meeting by contacting

Mr. Lois James, the NRC project manager, at 1-800-368-5642, extension 3306, or by email at Lois.James@nrc.gov no later than Tuesday, January 20, 2015. Members of the public may also register to provide oral comments within 15 minutes of the start of each session. Individual oral comments may be limited by the time available, depending on the number of persons who register. If special equipment or accommodations are needed to attend or present information at the public meeting, the need should be brought to Ms. James' attention no later than Tuesday, January 20, 2015, to provide the NRC staff adequate notice to determine whether the request can be accommodated.

Dated at Rockville, Maryland, this 23 day of December, 2014.
