**SUPPLEMENTARY INFORMATION:** The purpose of this collection is to provide qualitative and quantitative data to the DOA on the civilian workforce's attitudes, perceptions, and awareness of civilian career opportunities within the Federal Government. The DOA maintains a listing of professional and technical skill sets that are critical to the Service's needs of today and tomorrow. The collection, compilation, and analysis of the new qualitative and quantitative data is imperative to the DOA's marketing and recruitment strategy for informing, identifying, and ultimately hiring those identified with the skill sets necessary for a sustainable DOA. Attention will be focused in particular on DA Civilian critical occupations with current or projected shortfalls to set specific marketing objectives, goals, and strategies for these critical skill areas. Information for this study will be collected in two phases. Phase I will be qualitative (focus groups) and Phase II will be quantitative (survey). This is a one-time data collection anticipated to be completed within approximately six months of OMB approval. The data collected from these activities will be supplemented with reviews of recent Army branding and marketing practices as well as of recent and projected hiring needs into DA Civilian jobs.

*Title; Associated Form; and OMB Number:* Civilian Attitudes and Feedback on the Affectedness of DOA Recruiting Techniques (Advertisements and Marketing) for Government Service Positions within the Service; Control Number 0702-XXXX

*Needs and Uses:* The collection of information is necessary to provide the data needed to understand the best strategies to raise awareness and spark interest in Army civilian employment opportunities with the ultimate goal of filling critical DA occupations.

*Affected Public:* Individuals or Households.

#### Focus Groups

#### SUPPLEMENTARY INFORMATION:

##### I. Discussion

The U.S. Department of Energy (DOE or the Department) seeks to develop common definitions for Zero Energy Buildings (ZEBs). Broadly accepted market definitions of ZEB boundaries and metrics are foundational to efforts by governments, utilities, or private entities to recognize or incentivize zero energy buildings. DOE expects to use the definition and guidelines in DOE projects that provide guidance on the design or operations of zero energy buildings, and in any DOE programs that recognize or track zero energy buildings.

To help inform decision-making regarding commonly-accepted ZEB definitions and nomenclature, DOE is publishing this to request information and comment about the definitions, nomenclature, and guidelines. The Department will consider all input it receives and plans to publish a report on definitions in 2015. In particular, DOE seeks comment and information about the topics below.

1. Definitions: Are the Zero Energy Building, Zero Energy Campus, Zero Energy Portfolio, and Zero Energy Community definitions reasonable and appropriate when applied to their respective scopes? Should the broad characterizations of zero energy be changed in any way between building, campus, portfolio and community?

2. Nomenclature: Are the definitions provided in the nomenclature section of the draft clear and complete? Please provide specific feedback about these definitions.

3. Are there any recommendations regarding the topics addressed in the section "Additional considerations under review"?

4. Are there any specific recommendations for a uniform approach to tracking renewable energy generation for the purpose of "zero energy" claims to avoid double-counting?

5. Are there any other recommendations that would help clarify and improve the definitions, nomenclature, and guidelines?

##### II. Public Participation

All interested parties are invited to submit in writing by the date specified previously in the **DATES** section of this RFI, comments and information on all elements listed in the discussion section above. DOE considers public
