**Request for Information**

We are soliciting information from other agencies and the public that will help us determine what, if any, protective regulations are necessary and advisable for the conservation of these 20 newly listed coral species. This includes information that will help us understand and analyze impacts of various activities, the existence and efficacy of ongoing conservation activities, and prohibitions that are both necessary and advisable to reduce threats and amenable to management for the conservation of these 20 species. Specifically, we are soliciting information including the following: (1) Current or planned activities within the range of these species and their possible impact on these species; (2) impacts within the species’ ranges that fall within any of the nine major threat categories: Ocean warming, disease, ocean acidification, sea-level rise, nutrient enrichment, sedimentation, predation, trophic effects of fishing, and collection and trade; (3) information on which of the section 9(a)(1) prohibitions on take are necessary and advisable for the conservation of these species, with associated justification; (4) specific activities that should be prohibited for the conservation of the 20 coral species, with associated justification; (5) specific activities that should be excepted from any prohibitions that may be applied because they either provide a conservation benefit or do not detract from the conservation of these species, with associated justification; (6) existing permitting programs that may already provide for the conservation of listed corals through their activity evaluation and permitting process, with associated justification; and (7) the economic costs and benefits likely to result from protective regulations (see **DATES** and **ADDRESSES**).

We will fully consider all relevant information received in our determination of what protective regulations are necessary and advisable for the conservation of the species.

#### SUPPLEMENTARY INFORMATION:

##### Background

On December 9, 2014, we published a proposed rule to designate critical habitat for the threatened Arctic ringed seal under the ESA (79 FR 73010). At that time, we opened a public comment period on the proposed rule through March 9, 2015, and announced that four public hearings will be held on the proposed rule in Alaska, one each in Anchorage, Barrow, Kotzebue, and Nome.
