Needs and Uses: The Commission seeking and extension of this information collection in order to obtain the full three year approval from OMB. There are no changes in any of the reporting and/or recordkeeping requirements. There is no change to the Commission's previous burden estimated.

The Commission established a voluntary electronic method of complying with the reporting that EAS participants must complete as part of the national EAS test. This electronic submission system will impose a lesser burden on EAS test participants because they can input electronically (via a web-based interface) the same information into a confidential database that the Commission would use to monitor and assess the test. Test participants would submit the identifying data prior to the test date. On the day of the test, EAS participants would be able to input immediate test results. They would input the remaining data called for by our reporting rules within the 45 day period. Structuring an electronic reporting system in this fashion will allow the participants to populate the database with known information prior to the test, and thus be able to provide the Commission with actual test data, both close to real-time and within a reasonable period in a minimally burdensome fashion.
