

information that improves the nation's ability to evaluate potential human health effects from chemical or physical exposures. The NTP plays a critical role in providing needed scientific data, interpretations, and guidance on the appropriate uses of data to regulatory agencies and other groups involved in health-related research and in providing information to regulatory agencies about alternative methods for toxicity screening.

The results of NTP's long-term, generally two-year, toxicology and carcinogenicity studies, are published as NTP Technical Reports. The NTP uses established criteria to evaluate the findings and determine the strength of the evidence for conclusions regarding the carcinogenic activity of each substance evaluated. Panels are technical, scientific advisory bodies established to provide independent scientific peer review of the draft NTP Technical Reports.
