

information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).  
*Title:* Alaska Region Logbook Family of Forms.

*OMB Control Number:* 0648–0213.  
*Form Number(s):* None.

*Type of Request:* Regular (revision and extension of a currently approved information collection).

*Number of Respondents:* 543.

*Average Hours per Response:* Catcher Vessel trawl gear daily fishing logbook (DFL), 18 minutes per active response and 5 minutes per inactive response; Catcher vessel longline or pot gear DFL, 28 minutes per active response and 5 minutes per inactive response; 41 minutes per active response and 5 minutes per inactive response for Catcher/processor Longline and Pot Gear daily cumulative production logbook (DCPL); 23 minutes for Buying Station Report; 5 minutes for Shoreside Processor Check-in/Check-out Report; 20 minutes for Product Transfer Report and 14 minutes for Vessel Activity Report.

*Burden Hours:* 12,510.

*Needs and Uses:* The Magnuson-Stevens Fishery Conservation and Management Act 16 U.S.C. 1801 *et seq.* authorizes the North Pacific Fishery Management Council (Council) to prepare and amend fishery management plans for any fishery in waters under its jurisdiction. National Marine Fisheries Service, Alaska Region (NMFS) manages: (1) The crab fisheries in the Exclusive Economic Zone (EEZ) waters off the coast of Alaska under the Fishery Management Plan for Bering Sea and Aleutian Islands Crab; (2) groundfish under the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Management Area; and (3) groundfish under the Fishery Management Plan for Groundfish of the Gulf of Alaska. The International Pacific Halibut Commission (IPHC) and NMFS manage fishing for Pacific halibut (*Hippoglossus stenolepis*) through regulations established under the authority of the Northern Pacific Halibut Act of 1982. The IPHC promulgates regulations governing the halibut fishery under the Convention between the United States and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea.

Vessels required to have a Federal Fisheries Permit (FFP) are issued free daily fishing DFLs for harvesters and DCPLs for processors to record groundfish, Crab Rationalization Program (CR) crab, Individual Fishing

Quota (IFQ) halibut, IFQ sablefish, Western Alaska Community Development Quota Program (CDQ) halibut, and prohibited species catch (PSC) information. Catcher vessels under 60 ft (18.3 m) length overall are not required to maintain DFLs. Multiple self-copy logsheets within each logbook are available for distribution to the harvester, processor, observer program, and NOAA Fisheries Office for Law Enforcement. The longline or pot gear logbooks have an additional logsheet for submittal to the IPHC.

In addition to the logbooks, this collection includes the buying station report, check-in/out for shoreside processors, product transfer report, and U.S. vessel activity report.

*Revision:* Paper logbooks for catcher processors with trawl gear and motherhips have been discontinued and replaced by eLogs in OMB Control No. 0648–0515.

*Affected Public:* Business and other for-profit organizations; individuals or households.

*Frequency:* Daily and on occasion.

*Respondent's Obligation:* Mandatory.

## DEPARTMENT OF COMMERCE

### Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).

*Title:* Cooperative Game Fish Tagging Report.

*OMB Control Number:* 0648–0247.

*Form Number(s):* NOAA 88–162.

*Type of Request:* Regular (extension of a currently approved information collection).

*Number of Respondents:* 10,000.

*Average Hours per Response:* 2 minutes.

*Burden Hours:* 333.

*Needs and Uses:* This request is for extension of a current information collection.

The Cooperative Game Fish Tagging Program was initiated in 1971 as part of a comprehensive research program resulting from passage of Public Law 86–359, Study of Migratory Game Fish, and other legislative acts under which the National Marine Fisheries Service (NMFS) operates. The Cooperative Tagging Center attempts to determine the migration patterns of, and other biological information for, billfish, tunas, and swordfish. The fish tagging report is provided to the angler with the tags, and he/she fills out the card with the information when a fish is tagged and mails it to NMFS. Information on each species is used by NMFS to determine migratory patterns, distance traveled, stock boundaries, age, and growth. These data are necessary input for developing management criteria by regional fishery management councils, states, and NMFS.

*Affected Public:* Individuals or households.

*Frequency:* On occasion.

*Respondent's Obligation:* Voluntary.

This information collection request may be viewed at [reginfo.gov](http://reginfo.gov). Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov) or fax to (202) 395–5806.

Dated: February 4, 2015.

## DEPARTMENT OF COMMERCE

### Bureau of Industry and Security

[Docket No. 150127079–5079–01]

### Foreign Availability Determination: Anisotropic Plasma Dry Etching Equipment

**AGENCY:** Bureau of Industry and Security, Department of Commerce.

**ACTION:** Notice of Foreign Availability Determination.

**SUMMARY:** This notice announces that the Under Secretary for Industry and

Security has determined that foreign availability exists for anisotropic plasma dry etching equipment controlled for national security reasons under Export Control Classification Number (ECCN) 3B001.c on the Commerce Control List. This foreign availability determination is in response to a submission from the Semiconductor Equipment and Materials International (SEMI) industry association. The Bureau of Industry and Security (BIS) has provided a proposal to the Department of State to submit to the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies to remove the 3.B.1.c control from the Arrangement's Dual-Use List. This determination was made pursuant to Section 5(f) of the Export Administration Act of 1979, as amended, and Part 768 of the EAR.

**ADDRESSES:** BIS welcomes comments on this foreign availability determination on an ongoing basis. You may submit comments by any of the following methods:

- *Email:* [EtchComments@bis.doc.gov](mailto:EtchComments@bis.doc.gov). Include the phrase "Anisotropic Plasma Dry Etching Equipment Determination" in the subject line;

- *Mail:* Orestes Theocharides, Office of Technology Evaluation, Bureau of Industry and Security, U.S. Department of Commerce, Room 1093, 1401 Constitution Avenue NW., Washington, DC 20230; or

- *Fax* to (202) 482-5361. Include the phrase "Anisotropic Plasma Dry Etching Equipment Determination" in the subject line.

**FOR FURTHER INFORMATION CONTACT:**

Gerard J. Horner, Office of Technology Evaluation, Department of Commerce, Room 1093, 1401 Constitution Avenue NW., Washington, DC 20230, Telephone: (202) 482-2078; email: [gerard.horner@bis.doc.gov](mailto:gerard.horner@bis.doc.gov).

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 5(f) of the Export Administration Act of 1979, as amended (EAA), authorizes the Secretary of Commerce to conduct foreign availability assessments to examine and evaluate the effectiveness of U.S. export controls on certain items that are controlled for national security reasons under the Export Administration Regulations (EAR) (15 CFR parts 730-774). The Bureau of Industry and Security (BIS) has been delegated from the Secretary of Commerce the responsibility for conducting these assessments and issuing a final foreign availability determination. Part 768 of the EAR sets forth the procedures

related to foreign availability assessments.

On July 16, 2014, BIS received a foreign availability submission from the Semiconductor Equipment and Materials International (SEMI) industry association, a group of companies that does business all over the world and that serve the manufacturing supply chain for the micro- and nano-electronics industries. SEMI's July 16, 2014 submission asserts the foreign availability of anisotropic plasma dry etching equipment in China. This type of semiconductor etching equipment is controlled for national security reasons under Export Control Classification Number (ECCN) 3B001.c on the Commerce Control List (CCL). It is used in the process for producing dual-use semiconductor devices such as flash memories, microwave monolithic integrated circuits, transistors, and analog-to-digital-converters. These devices are used in civil and military applications such as radars, point-to-point radio communications, microprocessors, cellular infrastructure, and satellite communications. The national security control BIS has applied to anisotropic plasma dry etching equipment implements the Wassenaar Arrangement's Dual-Use List 3.B.1.c control. SEMI's submission asserts that anisotropic plasma dry etch equipment of comparable quality to that subject to control under ECCN 3B001.c is available-in-fact from China in sufficient quantities to render the U.S. export control of the equipment ineffective.

After reviewing SEMI's submission, on September 8, 2014, BIS published in the **Federal Register** a Notice of Foreign Availability Assessment: Anisotropic Plasma Dry Etching Equipment (79 FR 53166), which formally initiated a foreign availability assessment. To carry out the assessment, BIS conducted interagency meetings with stakeholders, obtained input from the exporting community, and visited, in China, a producer of anisotropic plasma dry etching equipment meeting the 3B001.c control parameters, and a foundry using a Chinese-produced anisotropic plasma dry etching tool. As a result of BIS's analysis of the data collected through the assessment, BIS recommended that I determine that the etching equipment of ECCN 3B001.c capability is available-in-fact to China, from a non-U.S. (Chinese) source, in sufficient quantity, and of comparable quality so that continuation of the existing national security export control would be ineffective in achieving its purpose.

After reviewing the assessment and recommendation, I determined that

anisotropic plasma dry etching equipment controlled for national security reasons under ECCN 3B001.c on the CCL is foreign available to China. Consequently, BIS has submitted a proposal to the Department of State to remove the Wassenaar Arrangement's Dual-Use List 3.B.1.c control.

Dated: February 4, 2015.

**Mid-Atlantic Fishery Management Council (MAFMC); Public Meetings**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of a public meeting.

**SUMMARY:** The Mid-Atlantic Fishery Management Council's (Council) Tilefish Advisory Panel will hold a public meeting.

**DATES:** The meeting will be held Tuesday, February 24, 2015, from 9 a.m. until noon.

**ADDRESSES:** The meeting will be held via Webinar with a telephone-only connection option.

*Council address:* Mid-Atlantic Fishery Management Council, 800 N. State St., Suite 201, Dover, DE 19901; telephone: (302) 674-2331.

**FOR FURTHER INFORMATION CONTACT:**

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council; telephone: (302) 526-5255. The Council's Web site, [www.mafmc.org](http://www.mafmc.org) also has details on the proposed agenda, Webinar listen-in access, and briefing materials.

**SUPPLEMENTARY INFORMATION:** The purpose of the meeting is to create a fishery performance report by the Council's Golden Tilefish Advisory Panel (AP). The intent of this report is to facilitate a venue for structured input from the Advisory Panel members for the Golden Tilefish specifications process, including recommendations by the Council and its Scientific and Statistical Committee (SSC).

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management
