Nature and Extent of Confidentiality: There is no assurance of confidentiality provided to respondents concerning this information collection. If the Commission requests applicants to submit information that the respondents believe is confidential, respondents may request confidential treatment of their information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: FCC Forms 470 and 471 collect the information the Commission and the Universal Service Administrative Company (USAC) need to administer the schools and libraries universal service mechanism (informally known as the E-rate program), determine if entities are eligible for funding pursuant to the schools and libraries support mechanism, determine the amount of support entities seeking funding are eligible to receive, determine if entities are complying with the Commission's rules, and prevent waste, fraud, and abuse. The forms collect specific information to establish that economically disadvantaged schools and rural schools receive a greater share of E-rate program funding based on the percentage of students eligible in that school district for the national school lunch program (NSLP) (or other acceptable indicators of economic disadvantage determined by the Commission). The student poverty level needed to determine discounts for

libraries are based on the NSLP information for the school district nearby. In the *E-rate Modernization Order*, among other things, the Commission took steps to streamline the application process, provide exemptions from competitive bidding, implement a “district-wide” discount calculation mechanism, establish budgets for internal broadband connectivity, and extend the document retention period to ten years. FCC Forms 470 and 471 execute these changes for the E-rate application process and enable the Commission to collect data to facilitate measurement of progress towards the adopted performance goals established in the *E-rate Modernization Order*.

In addition, this collection is necessary to allow the Commission to evaluate the extent to which the E-rate program is meeting the statutory objectives specified in section 254(h) of the 1996 Act.

Proposed Project

State Health Department Access to Electronic Health Record Data from Healthcare Facilities during a Healthcare-Associated Infection Outbreak: A Retrospective Assessment—New—National Center for Emerging and Zoonotic Infections Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Two years ago, contaminated steroid injections caused the largest fungal meningitis outbreak in the United States, affecting 20 states and resulting in 751 infections and 64 deaths. The subsequent healthcare-associated infection (HAI) outbreak response required significant collaboration between healthcare providers and facilities and public health departments (HDS). Following the outbreak response, HDS reported that various challenges with access to patient health information in electronic health records (EHRs) hindered the efficient and rapid identification of potential fungal meningitis cases in healthcare facilities. The fungal meningitis outbreak experience highlights the need to better understand the landscape of granting and using access to EHRs for outbreak investigations.

The Division of Healthcare Quality Promotion (a component of NCEZID), the Office for State, Tribal, Local and Territorial Support, and the Office of Public Health Scientific Services at the Centers for Disease Control and Prevention (CDC) are partnering with Association of State and Territorial Health Officials and The Keystone Center to evaluate the challenges surrounding HDS access to EHRs in healthcare facilities' during an HAI outbreak investigation. The evaluation seeks to compile information across states from experts in the public and private sector to assess experiences, identify issues, and seek recommendations for improving HDS access to EHRs during future outbreaks.

In addition to a study report, the insights from healthcare facility staff will be used to build a toolkit to help state HDS understand the perspectives and needs of the healthcare facilities related to EHR access. The toolkit will provide perceived barriers, recommendations to overcome those barriers, best practices that support EHR access, and practical tools such as templates, memorandums of understanding (MOUs), and policies. The toolkit will be distributed to HDS, healthcare facilities, and other stakeholders to support awareness and
