

## The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 amends Class E airspace designated as an extension to Class C surface area, at Manchester Airport, Manchester, NH. Airspace reconfiguration extending from the 5-mile radius of the airport to 8.3-miles northwest of the airport is necessary due to the development of the RNAV (RNP) Z RWY 17 approach, and for continued safety and management of IFR operations at the airport. Also, the geographic coordinates of Manchester Airport are adjusted to coincide with the FAA's aeronautical database. An editorial change is made to correct the title of paragraph 6003 of FAA Order 7400.9Y, to read "Class E Airspace Designated as an Extension to a Class C Surface area".

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends controlled airspace at Manchester Airport, Manchester, NH.

## Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental

Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

**SUPPLEMENTARY INFORMATION:****History**

On October 17, 2014, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to establish Class E airspace at Robertson Field Airport, Plainville, CT, (79 FR 62366). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One anonymous positive comment was received.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9Y dated August 6, 2014, and effective September 15, 2014, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

**Availability and Summary of Documents for Incorporation by Reference**

This document amends FAA Order 7400.9Y, Airspace Designations and Reporting Points, dated August 6, 2014, and effective September 15, 2014. FAA Order 7400.9Y is publicly available as listed in the **ADDRESSES** section of this final rule. FAA Order 7400.9Y lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

**The Rule**

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E airspace extending upward from 700 feet above the surface within a 9.5-mile radius of Robertson Field Airport, Plainville, CT. Controlled airspace is required to support the new RNAV (GPS) standard instrument approach procedures for Robertson Field Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments.
